Travel Trailers

Enhance
Your Outdoor
Experience.

EVER GREEN
RECREATIONAL VEHICLES

Define Your Element. As Unique as Your Outdoor Experience.

With its automotive-inspired aerodynamic design, our Element travel trailer is as easy to tow as it is at turning heads. Form follows function as the streamlined front and rear caps combine with a spread-axle chassis designed to create a straight tracking, lightweight camper that you can pull with today's mid to full-sized SUV or half ton pickup.

There are three floorplans to choose from, sleeping four to six adults comfortably. From couples to small families, the floorplan you choose will define your Element with an emphasis on quiet travel, family outings, or entertaining. Opposing slide out rooms on all models open up the living area for a feel of coaches much larger.

The Element remains one of the most versatile, unique travel trailers ever produced. You can rest assured, it's an EverGreen original.

All Element bedrooms, 26RBSS shown here, feature 60x80 inch standard queen beds. Wardrobe storage on both sides of the bed include dressing mirrors.

Opposing kitchen and dinette slide rooms in the 28RLSS open up the food prep and living areas. Note the entertainment center—everyone ends up in the kitchen!

The Element of Inspiration.

The Re-imagined Element.

The entire lineup has additional luxury features such as Corian™ countertops, island kitchens, larger resort showers with seating and many other amenities—all now at a more affordable price!

The optional full windshield skylight over the front lets you star gaze as you drift to sleep. A sliding blind over the front windshield provides privacy. Kitchen islands in all models become the focus of the dining and living area. Choose from floorplans with wrap around rear dinette sofas, a variety of couches and over-padded swivel lounge chairs.

Element Has the EverGreen Difference

Element is built with “The EverGreen Difference.” Construction techniques, such as vacuum laminated roof, DuraLite™ Double Welded Aluminum Structure with full aluminum framing of all windows, doors and storage openings, combine for a long lasting foundation to your investment.

Outside, frameless automotive style windows are crafted of PrivaGuard® tinted glass to provide energy efficiency and privacy. The ultra aerodynamic exterior of the Element is designed for improved fuel economy and straight tracking down the road. The spread axle design system provides balanced stability for easy towing with a flex suspension system to reduce vibration transmitted to the coach. The Diamond Shield stone guard on the front of the Element provides transparent protection against road debris.

The 26RBSS shown here, is a rear bath model that opens up the front of the coach to entertaining with seating for six.

The bathroom of the 26RBSS has a multitude of built in cabinets and drawers. The large resort style shower has a seat along with sliding glass doors.

28RLSS

The dinette in all Element models folds down for an additional bed.

No one builds travel trailers like EverGreen.

Take the time to compare because there is an “EverGreen Difference.” Since we first revolutionized the RV industry with the first all composite travel trailer, we’ve been busy focusing on the innovation front with new manufacturing and material specifications to build a better trailer for your family.

Construction Features

Walls

- 11 Woven plastic floor brace
- 12 Plywood substrate
- 13 High-density, block foam insulation
- 14 Padded “No-Crack” vinyl floor
- 15 Steel I-beam frame

Roof

- 5 Fully welded crowned aluminum frame
- 6 High-density, block foam insulation
- 7 Plywood substrate
- 8 Reflective, white TPO roofing

DuraLite™ Double Welded Aluminum Structure

Element is built on the DuraLite Double Welded Aluminum Structure. It includes six-sided double-welded aluminum frame construction in the walls, roof and floors, with header framing around all doors, windows and baggage door openings. Our strong, durable frame eliminates flexing and DuraLite is superior to wood frame construction used in other travel trailers, which can rot when exposed to water.

The tough, automotive-grade PrivaGuard glass option maintains privacy from the outside while providing panoramic views from the interior of your Element. Curved, European shades provide full privacy.

Sixteen-inch automotive style aluminum wheels with spread axle design, and Equaflex suspension.

Standard Features and Optional Packages

EXTERIOR

- Vacuum laminated, welded aluminum sidewalls, roof and floor
- Spread axles for increased stability
- Door side patio light
- LCD TV bracket and cable hook up
