Generations of family fun.

TOY HAULERS

2015 OCTANE AND SEISMIC BY JAYCO

2
YEAR
WARRANTY

This 1986 brochure cover inspired our 2015 literature.

BUILT TO **open up** A WORLD OF FUN

**TRAVEL
TRAILERS**

Octane Super Lite

One of the industry's lightest toy haulers — PAGE 4

Octane

A hard-core, toy-toting travel trailer — PAGE 4

**FIFTH
WHEELS**

Seismic Wave

Our all-new, value-packed crossover — PAGE 8

Seismic

Jayco's most luxurious crossover — PAGE 10

For 45 years, Jayco has helped create generations of family fun, and over the course of that time, fun still looks remarkably the same. From campfires to fishing, from relaxing to eating, fun has the same feel generations later—and all with a Jayco RV nearby. Today, we're the largest family-owned RV manufacturer in the world, and our promise is to continually strive to build family-friendly products that will outlast just about everything but your memories. Join us in our generations of family fun.

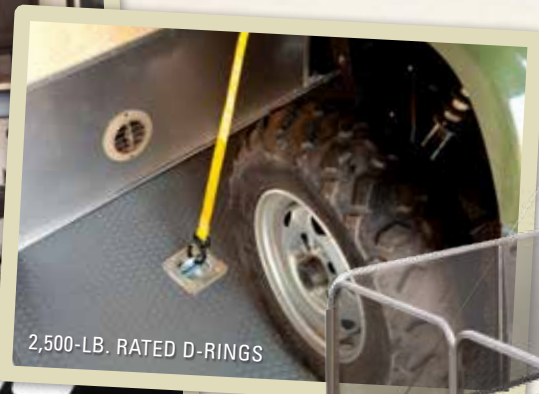

On the cover: The 1986 brochure artwork, illustrated by Tim MacDonald, was part of a successful ad campaign. These illustrations inspired the 2015 Jayco brochure covers, which are live re-creations of Tim's artwork.

The best toys deliver the most fun, which is why the 2015 Jayco toy hauler lineup packs a radical list of amenities. For 2015, the Octane travel trailer and the Seismic fifth wheel deliver more cargo amenities than any other toy hauler, making these versatile models a toy in themselves.

OPEN FOR FUN

Ramp up your adventure with our hard-core garage, complete with 2,500-lb. rated D-rings, integrated steel backers for wheel chocks and an industry-leading, fully-insulated, vacuum-bonded 2" floor construction.

party deck [Optional — become the life of the party.]

TRAVEL THE UNBEATEN PATH

Your toy hauler needs to be tough enough to handle whatever the road throws at it. That's where the MOR/ryde suspension system* comes in. Replacing typical steel equalizers, MOR/ryde uses rubber springs to create a smooth ride while helping isolate road shock. E-Z Lube axles and Dexter Nev-R-Adjust brakes make sure you get to where you're going — safely.

* Not available on Octane Super Lite

OCTANE T31B | STEEL

Octane

Toy-toting travel trailers

With seven floorplans and so many standard features in two of the industry's lightest toy haulers, we prefer to call the 2015 Octane a fun hauler.

* The weights of certain options and/or option packages are not included in the UUV listed in the specification charts.

Unloaded Vehicle Weight (UUV): Sometimes referred to as "Dry Weight," UUV means the typical weight of this trailer as built at the factory. The UUV, as used in product literature and other promotional materials, does not include cargo, fresh water, propane, options or dealer-installed accessories

Gross Vehicle Weight Rating (GVWR): GVWR means the maximum permissible weight of the trailer, including the UUV plus passengers, personal items, all cargo, fluids, options, and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UUV and the CCC.

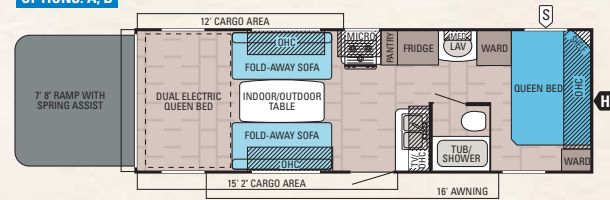

Cargo Carrying Capacity (CCC): CCC means the maximum weight of all passengers, personal items, food, fresh water, propane, tools, other cargo and dealer-installed accessories that can be carried by the trailer. CCC is equal to or less than GVWR minus UUV. The addition of options will decrease the CCC.

Hitch Weight (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight.

It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle before heading out on the roadways. When you tow an RV, you must drive differently than when you drive a single vehicle. Practice hooking up, driving, backing up and braking in a safe environment or seek out professional instruction. Jayco affixes a weight label to each RV which lists weight information for that vehicle. See specifications chart above.

SEISMIC EXTERIOR CHOICES

STANDARD GRAPHICS PACKAGE OPTIONAL PREMIUM PAINT PACKAGE

WE START WITH ONE OF THE INDUSTRY'S **strongest** foundations

Full-width outriggers: We build on full-width outriggers that are spaced 4-6 feet apart (vs. 8 ft.) to better support the weight of the wall.

4-6 ft.

Jayco builds on custom-sized frames, designed specifically for each floorplan. Other manufacturers use stock frames, modifying and welding the frame to fit.

I-Class cambered structural-steel I-beams: Jayco uses a unique molded, one-piece design to prevent unit from twisting; competing three-piece I-beams can warp over time at the welded seams.

– so that we can build the industry's most reliable RV

CLIMATE SHIELD

Extend your camping season

with the Jayco Climate Shield, featured on Seismic. Designed for efficient heating and cooling, Climate Shield protects against extreme heat and extreme freezing — even when temperatures hit a high of 100° F or a low of 0° F.

LIVING ROOM	KITCHEN	BATHROOM	HOLDING TANK	BEDROOM
0°F 70°	0°F 69°	0°F 71°	0°F 60°	0°F 71°
100°F 69°	100°F 70°	100°F 68°	100°F 72°	100°F 71°

UNIT AREA

- All vertical walls
- Behind front cap
- Roof
- Main floor
- Slide floor
- Bedroom floor
- Inside open pin box
- Enclosed drop-frame overhang

TYPE OF INSULATION

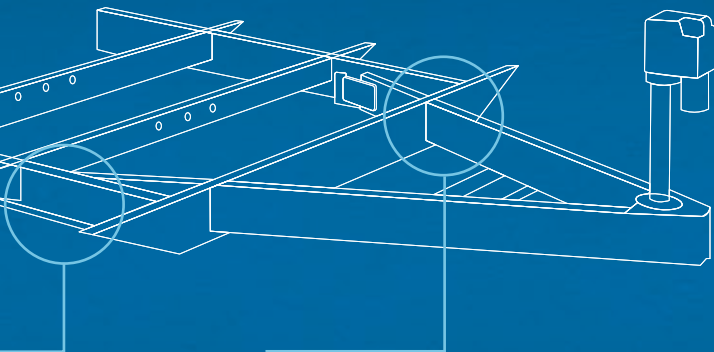

- Block foam
- Fiberglass insulation
- Fiberglass insulation + foil
- Fiberglass insulation + foil
- Foil
- Fiberglass insulation + foil
- Foil
- Foil

FIFTH WHEEL CONSTRUCTION

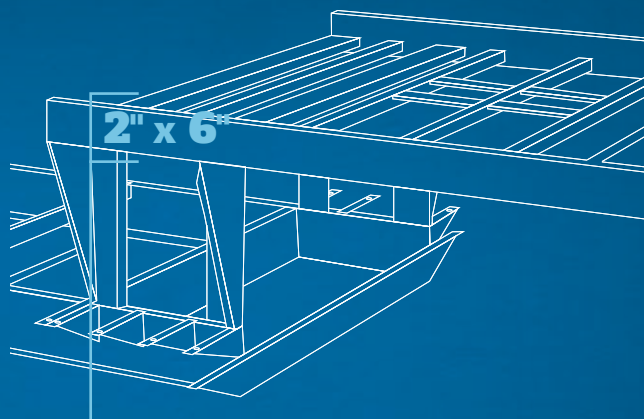

extra measures for extra warmth

- 1 In the upper area of the fifth wheel floorplan, Jayco uses a double layer of fiberglass insulation behind the front cap, along with Flexfoil and fiberglass insulation in the floor, to provide extra warmth where it's needed most — in the bedroom.
- 2 Jayco's aerodynamic front cap is engineered to withstand the rigors of the road. This gel-coated fiberglass cap features more support with 1/4" plywood bracing, not typically found on other fifth wheels.

* Seismic was tested in 0° F and 100° F weather over an extended period of time in a controlled environment and all functions of the coach were fully operational. Testing cannot account for natural elements, such as wind or moisture. In actual use, unit may not perform as tested. In addition, outside components are subject to freezing and require steps to properly insulate. Jayco's warranty does not cover damage caused by freezing.

Octane travel trailer integrated A-frame: The A-frame runs through the main frame, preventing the hitch from buckling like competing tack-welded frames.

Seismic fifth wheel frame: The frame over the truck bed is built on superior 2" x 6" tube perimeter structure to better support the bedroom sidewalls. Some fifth wheels have a smaller frame, and these manufacturers may add a sidewall support seam to compensate for expansion joints.

THE MAGNUM TRUSS ROOF SYSTEM 50 percent stronger

In a side-by-side comparison test, Jayco's exclusive Magnum Truss Roof System withstood 4,500 lbs. — 50 percent more than other roofs. The difference?

- 3 Jayco uses 5" crowned wood trusses (4 1/2" on Octane), solid-wood studs and oversized nail plates to maximize the roof's load capacity.
- 4 Then, we screw down 3/8" roof decking at every seam, a process that is more durable than stapled construction.
- 5 Finally, our one-piece, sidewall-wrapped DiFlex II material provides the ultimate in leak protection.

WALL CONSTRUCTION

vacuum-bonded walls

- 6 Using 144 tons of pressure for 16-18 minutes, Octane and Seismic feature durable, vacuum-bonded walls, while smooth, high-gloss fiberglass exteriors provide long-lasting appeal (n/a Octane Super Lite).
- 7 Welded aluminum framing gives our toy haulers a durable, lightweight structure.

GARAGE CONSTRUCTION

fortified for your toys

- 8 Octane and Seismic are among only a few toy haulers in the industry with vacuum-bonded, block foam-insulated, 2" garage floors, delivering added durability for your heavy toys.
- 9 D-rings, rated for 2,500 lbs., are mounted through the vacuum-bonded floor and bolted to a steel plate attached to the frame. Some manufacturers don't add this extra reinforcement.

2
YEAR
WARRANTY

Jayco[®]

Generations of family fun.

Bumper-to-front limited warranty*

FAMILY **fun** starts with peace of mind

At Jayco, we build our RVs to handle every adventure, then we back our products with an industry-leading 2-year limited warranty. You won't find a better warranty in the business because the only strings we attach are those that deliver the ultimate in reliability. That's the Jayco difference. So go explore. We have the warranty that will follow you anywhere.

*For a copy of our 2-year limited warranty with full terms and conditions, please contact your local Jayco dealer.

FREE Roadside Assistance

Travel worry-free with Jayco's Customer First Roadside Assistance program, yours at no cost during the first year of ownership. This program is offered through Coach-Net, the country's largest RV emergency road service, and gives you immediate access to assistance.

The fun starts with your local Jayco dealer

Your local dealer

From giving advice to selling and servicing products, we consider our loyal dealers the glue in our family bond. Establishing a solid relationship with your local Jayco dealer is a key component in the enjoyment of your new Jayco. By purchasing from a local dealer, you will have a convenient location for sales, parts and service support. We hope you consider them a part of your camping family.
