QUALITY Comes STANDARD.

EXCLUSIVE SQUARE PLATFORM CHASSIS DESIGN.

The Cameo frame is engineered, constructed and welded in our own plant for superior quality and durability. Carriage's exclusive frame design features double stacked, steel box tube that offers more protection from bending and twisting compared to a standard I-beam. As a matter of fact, we back it with our 5-year limited structural warranty.

FULL-WALL SLIDEOUT. Carriage leads the industry with full-wall (nearly 30') slideouts on select models. All models offer large, multiple slideouts for maximum living space.

INTEGRATED HITCH/RECEIVER.

Carriage offers an optional 2" hitch/receiver integrated into the frame with skid bars. Tested and rated for 350 lbs of tongue weight and 2,500 lb towing capacity.

RUNNING GEAR.

Dexter® E-Z Lube axles are secured with heavy-duty springs and a stronger weld on the spring hangers. Mor-Ryde suspension is standard on Cameo.

INDUSTRY-LEADING SLIDEOUT CONSTRUCTION. Gear-driven, rack and pinion mechanism • Fully insulated slideout rooms, roofs, walls and floors • H-seal "squeezegee" enclosure wipes elements from the walls and roof • The wedge-slant design directs water away from the coach

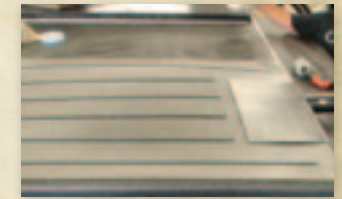

Many manufacturers cut into the frame for the slide mechanism, which weakens the chassis. At Carriage, we build the slideouts above the subfloor and below the main floor, for superior structural integrity.

POLYESTER FABRIC UNDERBELLY.

Breathable fabric lets moisture out but none in, eliminating condensation build-up • Highly durable • Zippered for service access • Resistant to road salt and oil • Puncture resistant

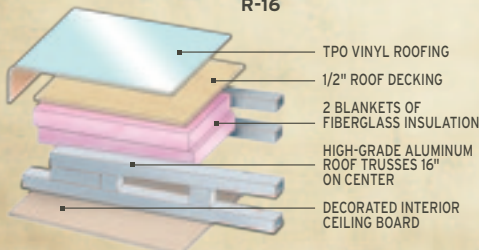

HOLDING TANKS. The large holding tanks are heated by the furnace and feature an ABS outside shell and three layers of insulation, to ensure the comfort of full-time users.

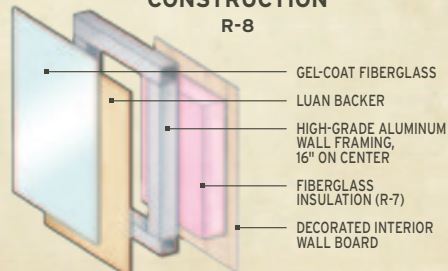

SUPERIOR INSULATION

• Multi-layer wall, floor and ceiling design • Whole-house climate control • Superior moisture resistance •
