Keystone RV
Company

Operate two A/C units simultaneously for the most cooling power in the industry.

Keystone's Impact engineering team partnered with Dometic to build a game changing air conditioning system for our owners who like to play in hotter climates. With Omni Chill, Impact owners can operate two of their toy hauler's air conditioners simultaneously on a 30-AMP circuit. Other manufacturers' systems require owners to cycle their air conditioners, running only one unit at a time. Testing has shown that OmniChill's revolutionary technology keeps coaches up to eight degrees cooler than our competitors in 100°F ambient temperature.
