WINNEBAGO®

On the Cover: 24J Bay Mist Full-Body Paint

In a Class by Itself

When you want the mobility of a Class C coach with amenities, look no further than the Winnebago® Navion®. It takes full advantage of the Sprinter Chassis platform to present many of the finest motorhome features in a compact footprint. The 24G has been completely redesigned with a more spacious lounge that gives you the option of a large dinette or comfortable queen size sofa/sleeper. If you want

something with a little more sleeping versatility, select the 24V with the Flex Bed system that easily converts between a queen bed or two twin beds. And if size is what matters, the U-shaped dinette in the 24J opens up to a massive 80" sleeping space. When it comes to RV lifestyle, the right look and a comfortable interior make all the difference. See what you've been missing in the Winnebago Navion.

READERS' CHOICE
WINNER
Class C

24J Zinc with High-Gloss Marbella Cherry/Canvas Cabinetry

Navion SuperStructure

Fiberglass Roof The crowned, one-piece fiberglass roof is backed by a 10-year limited parts-and-labor roof skin warranty.

Thermo-Panel® Sidewalls By layering fiberglass and high-density block foam insulation with welded aluminum support structures, we create some of the industry's strongest, most durable and lightweight sidewalls.

Laser-Cut Tubing

Precision laser cutters create precise joints in structural steel that are stronger and require less welding.

Embedded Steel

Metal substrates embedded into the sidewall provide solid attachment points to keep cabinets and appliances mounted securely in place.

Solid Framework

Structural extruded aluminum creates an extremely strong and solid structural framework.

E-Coating

An electrodeposition coating helps protect critical steel components.

**SUPER
STRUCTURE**

BUILT TO LAST

Every coach—from our smallest Class C to our largest diesel-pusher model—is built to Winnebago's® legendary SuperStructure® construction design. It's a process developed and refined over more than 50 years of building some of the strongest, most durable coaches in the industry.

TESTING Before rolling out of our factories, every coach undergoes an extensive 113-point inspection. Each coach also passes a high-pressure water test that simulates rain at a rate of 50-inches per hour to check for leaks. During the design process, our computer simulations, physical testing center, and rigorous test track ensure each model is built to last.

DETAILS At Winnebago, we treat the features you can't see with the same care as the ones you can. Look in the access panels of some of our competitors' coaches and you'll see loose insulation and wires haphazardly strewn about. Winnebago maintains a clean fit and finish throughout so your coach will last for the long haul.

BUILT IN-HOUSE

We process and finish key aluminum parts. We rotocast our own plastic components. In fact, we manufacture most of our own parts so they are designed to fit the space, rather than fitting the space to an awkward off-the-shelf component size.

SUPER[®] STRUCTURE

BUILT TO LAST

 Visit BetterBuiltRVs.com to gain real insight into what goes into a Winnebago motorhome.

TAKE A TOUR We're proud of our processes, state-of-the-art facilities, and the people who make Winnebago number one. We invite you to visit our complex in Forest City, Iowa, for a firsthand look at the dedication and technology behind every motorhome we build.

FOOTNOTES

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please check with your dealer for further information.
- Flooplans feature a wide-body design - over 9'6". In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 9'6" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
- The load capacity of your motorhome is designed by weight, not by volume. So you cannot necessarily use all available space when loading your motorhome.
- Capacities are based on measurements prior to tank installation. Slight capacity variation can result due to installation applications.
- Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
- Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR, and GCWR as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
- See separate chassis warranty.
- See your dealer for complete warranty information.

Winnebagolnd.com Has All The Answers

Visit Winnebagolnd.com on your computer, smartphone, or tablet for the latest product information and updates.

The screenshot shows a mobile-optimized website for Winnebagolnd.com. At the top, there's a dark header with the Winnebago logo and a navigation menu. Below the header, a large video player displays a video of a person in a boat. To the right of the video, text reads "Welcome to Winnebagolife" and "We call it GoLife for short". Below the video, there are several cards with different content: "I'm Ready for my Close-up", "Winnebago TV" (with a play button), and "A lifestyle blog for motorhome news, personal travelogues, and community stories". The footer contains links like "winnebagolife.com", "YouTube", "Follow us", and "Watch us".

A person's hands are shown holding a tablet device, which displays the Winnebagolnd.com website. The website features a dark theme with various sections and images related to Winnebago products and adventures. In the background, a wooden table is visible with a white cup containing coffee. The overall scene suggests a relaxed, outdoor setting.
