WE STARTED WITH A NEW CHASSIS.  
WE ENDED WITH A NEW CLASS OF  
GAS-POWERED LUXURY MOTOR HOME.

**WINNERAGO**  
INDUSTRIES

## THE NEW DIRECTION IN LUXURY.

The 1999 Vectra Grand Tour® truly is more than a new motor home. It's a step forward in luxury class design. Built exclusively on the highly acclaimed heavy-duty Chevrolet P-12 front engine gas chassis, this widebody design features unmatched strength and durability, along with the most luxurious appointments ever offered in a Vectra Grand Tour.

37B

In the slideout galley you'll find increased workspace, beautiful solid-surface countertops, vinyl plank flooring, finely finished contemporary cabinetry with integrated toe-kick panels and a Maytag® range with sealed burners.

37B

The tastefully appointed bath area is also quite roomy, thanks to the cross coach design and use of space-saving pocket doors. Includes private toilet area, textured glass shower door, premium vinyl flooring, a solid-surface countertop with integrated sink, and an abundance of storage space in the wardrobe.

37B

The available dining table with self-storing leaf and two free-standing chairs (standard on the 39Y) also includes two stowable folding chairs for easy entertaining. Interior comfort is maintained throughout by a high efficiency central air conditioner housed below the coach with an integrated ceiling distribution system. For your listening pleasure, Vectra Grand Tour includes a deluxe mobile theater sound system inside and an exterior entertainment center.

Thanks to the new heavy-duty gas chassis, Vectra Grand Tour is able to offer features not available on most diesel pushers, including the slideout bedroom. This innovative design provides significantly increased floor space in the bedroom. Features include a dresser, a hamper, a vanity, and a large closet. The easily accessible, 80" long residential size queen bed with Serta® innerspring mattress has gas-spring supports for easy lift-up access to storage below. Additional storage space is provided by large overhead cabinets in the slide room.

37B

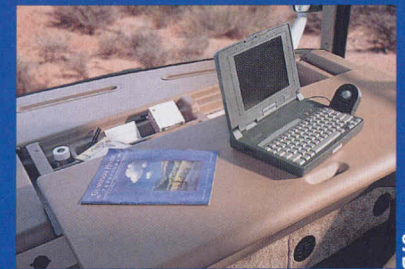

37B

37B

The driver's area is engineered for safety and comfort. The 3-point seat belts include adjustable D-loops for comfort. A Sony® RearVision system with one-way audio displays objects behind the motor home on a 7" in-dash mounted monitor, making backing-up safe and simple.

37B

A workstation slides out of the dash to form a passenger side work table. The cover also lifts up to provide access to segmented storage space located underneath.

37B

The galley/sofa slide room has a unique mechanical benefit that adds function to the obvious benefit of increased living area. Our innovative **STOREMORE™** Hydraulic Slideout System utilizes the rugged HWH SpaceMaker™ system that works in tandem with the hydraulic leveling jacks. With the StoreMore system, you don't have to sacrifice interior cabinet or exterior compartment space with a slideout. Other innovations include the use of the Tri/Mark KeyOne™ System with common-key locks for the main entry door, driver's door, storage compartments and fuel fill. The KeyOne System lightens your keychain and makes access fast and easy.

Vectra Grand Tour is built on one of the strongest foundations in the industry. For instance, the cab area features Winnebago Industries' all-steel welded and electrodeposition coated cab structure for unmatched strength and durability. And the new low-profile engine cover allows easy access.

37B

Full-depth drawers located underneath the angled dinette add to the Vectra Grand Tour's already abundant storage space.

## 1999 VECTRA GRAND TOUR DECORS

The 1999 Vectra Grand Tour includes the choice of three interior decors. Every fabric and carpet is stain resistant. And each decor option is available with either Maple or Cherry woodwork.

### HEMINGWAY with Maple and Cherry

### LIGHT SILVER

### CHAMPAGNE

Exterior graphics packages are Light Silver Metallic or Champagne Metallic. You may order either exterior color, regardless of the interior color and wood combination you choose.

This bedroom features a beautiful wood dresser and vanity, spacious cross-coach wardrobe with large interior storage shelves and a tip-out hamper enclosed by full-length, sliding mirrored doors. An available 19" color TV with remote adds to the bedroom's list of amenities.

Located next to the private toilet and lavatory is this two-section storage cabinet. The lower portion of this cabinet may be exchanged for the available washer/dryer. This new larger capacity washer/dryer with vented design enhances drying capability. On 37B models, the available washer/dryer is located within the wardrobe.

## UNQUESTIONABLE RELIABILITY.

From the durable one-piece fiberglass roof — which adds structural integrity and doesn't expand, contract, tear, or show dirt like rubber surfaced roofs — to the basement's composite risers and steel perimeter tubing — which help support the weight of the floor and sidewalls — every element of the Vectra Grand Tour is built to stand the test of time.

37B

37B

Cleaning is easy with the available central vacuum cleaning system. Includes a powerful 120 VAC motor/canister unit and accessories.

37B

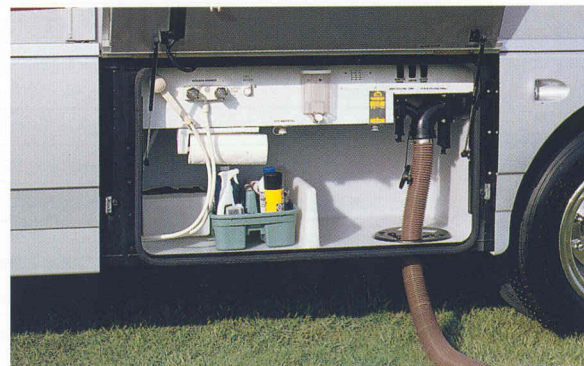

Vectra Grand Tour includes the innovative PowerLine™ Energy Management System. This fully automated system has the ability to run the air conditioner and numerous electrical loads at the same time when utilizing 30 amp. service by monitoring the usage of 120 volt power and redistributing it as needed.

The revolutionary Chevrolet P-12 Chassis and Winnebago Industries' innovative engineering and design combine to make the 1999 Vectra Grand Tour the grandest yet. The P-12 chassis, with a GVWR of 22,500 lbs., inspired Winnebago Industries to create a gas-powered motor home with a host of features normally reserved for pusher models — including things like towing, performance and unprecedented payload — all without a tag axle. Large 22.5" diameter wheels, Allison transmission, 145 amp. alternator, four wheel anti-lock brakes, and enhanced suspension work together to give the Vectra Grand Tour superior ride and handling (evidenced by a better turning radius than any previous gasoline engine chassis). Available stylized aluminum wheels, shown here, add to the beauty of the high gloss fiberglass exterior finish.

37B

Thanks to Winnebago Industries' ingenious **STOREMORE™** Hydraulic Slideout System, exterior storage space is plentiful. The unsurpassed, rugged design of the StoreMore system allows for full-length, full-height compartments which extend with the room — a feature most slideouts cannot offer.

37B

Separate water and electrical service centers neatly contain all controls and hook-ups in large compartments for increased work space. A second monitor panel, located in the water service center, allows quick and easy readings of tank levels.

♦ The height of each model is based on the curb weight of a typically equipped unit on the standard chassis. The actual height of your vehicle may vary by as much as 2" depending on chassis or equipment variations.

▲ These floorplans feature a widebody design – over 96" in width. In making your purchase decision, you should be aware that some states restrict access on some or all roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.

• Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to safety shut-off required on tank.

S Standard

O Optional

\* Not all options available in combination. See dealer for details.

∞ TV satellite system option does not include receiver or programming activation. Quality reception is only available in the lower 48 States.

Winnebago Industries' continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice.

## CONSIDER IT AN ADVANCED EDUCATION IN MOTOR HOMES.

There's much more to buying a motor home than simply finding one with comfortable furniture and inviting interior fabrics (although those things are important). In fact, we recommend people spend as much time examining the motor home's "unseen" features as they do looking over the interior appointments. For instance, there's a great deal you can learn about how well a motor home is constructed by simply looking inside the storage compartments.

To help make your buying decision easier, we've put together a user-friendly guide which lists the most important things you should be looking for in a motor home, no matter what make or model it is. "The Guide" also highlights the importance of meeting (and exceeding) industry standards, explains Winnebago Industries' one-of-a-kind construction process and details our industry-leading warranty and care programs. So ask for "The Guide" the next time you visit your Winnebago Industries dealer. This "advanced education" will definitely pay off down the road.
