

05 Suncruiser®

38J *Wedgewood with Sierra Maple*

05 SunCruiser | #1 in comfort.

Proud owners have made the SunCruiser our most popular Itasca Class A motor home. This year SunCruiser offers even more. Thanks in part to our SmartSpace™ design philosophy that makes the most of interior living space. With seven unique floorplans, some with triple slides, it's easy to find the motor home for which you've been searching. Additional seat belts for travel flexibility plus high-end features, like flat-face TVs and the available Sleep Number® bed, make the SunCruiser a joy to own.

Amberwood

Cosmic Sage

Wedgewood

🔗 The Suncruiser puts you right at home with premium Stitchcraft furniture and your choice from three interior colorways and four cabinetry woods. A residential-style catalyzed finish protects the cabinetry for unsurpassed beauty and durability. The 38J is especially home-like with a triple-slide floorplan that creates a spectacular living area, complete with a residential dining table that seats four and an entertainment center with a 27" flat-face TV. Every model features flush-mounted, dual-glazed windows for improved thermal efficiency. Day/night pleated shades, featured in the lounge, dinette and bedroom areas, offer multiple levels of light and privacy.

35U Cosmic Sage with Washed Maple

The Suncruiser offers all of the latest in home entertainment, starting with a 24" Sony® flat-face TV (27" TV comes standard on 37B, 38J, and 38R floorplans). Add the available DVD/VCR combo and a manual, powered or in-motion digital satellite dish and you'll never miss your favorite movies or programs. For movie theater sound, choose the available Deluxe Sound System with 5-channel QSURROUND™. Select the 300 watt inverter and enjoy these entertainment features even when you're not connected to shoreline or generator power.

Stainless steel appliances give the Suncruiser the cutting-edge look you've always wanted. The standard package includes a

three-burner range with oven, a large double-door refrigerator/freezer and a 30" sensor cook microwave with range fan. Upgrade to the microwave/convection oven and a four-door refrigerator/freezer with icemaker (NA 33V) to increase your cooking options. Both refrigerators come with a slideout pantry for your dry goods. Solid-surface countertops with a flip-up extension provide all the workspace you need. A water filtration system delivers clear, delicious water through a separate spout.

Portsmouth Oak

Concert Cherry

Washed Maple

Sierra Maple

37B Amberwood with Portsmouth Oak

A rear slideout comes standard on every model, creating a spacious bedroom, complete with a walk-around, queen-size bed and a cedar-lined wardrobe. The DVD/VCR combo in the front entertainment center can play movies on the 20" flat-face bedroom TV (24" on 37B). Built-in remote extenders lets you control the DVD/VCR from the bedroom. A rear stereo system is also available, including an AM/FM radio, CD player and an alarm clock.

Upgrade the bedroom to include a queen-size Sleep Number bed by Select Comfort™. A handheld remote on each side of the bed lets you quickly and independently adjust the mattress firmness to your ideal level of comfort and support...your sleep number which is The Key to a Perfect Night's Sleep!™

Two rear slideouts create a unique bedroom sitting area in the 37B. Choose between two chairs with tuck-away ottomans or one chair and a desk. The ottomans feature flip-top storage – perfect for storing odds and ends or an extra blanket or two.

Relax in an always-soothing shower, thanks to the Moen® Posi-Temp® control valve, which maintains a steady water temperature even when water pressure fluctuates. Most models also offer an available shower package with a fold-down shower seat and a handheld showerhead. The entire bathroom is spacious and well-designed to make you feel more at home.

You'll love the flexibility of the hoop-base recliner, available in soft UltraLeather HP™. It moves easily to your favorite spot in the coach when you're not traveling. A slideout lounge table is located near the recliner on most models.

You'll have plenty of options when you select the multifunction dining table. It provides dining for two, expands to seat four, and functions as a computer desk (available on the 35U and 38G).

The elegant dining table provides spacious dining for two and easily expands to accommodate guests.

The BenchMark™ full comfort dinette is another Winnebago Industries® exclusive and comes standard on most models. It features seats with an innerspring design for complete residential style and comfort. Lift up the seats to reveal large, easy-to-access storage or convert the whole dinette into a comfortable bed. A child-seat tether anchor is located in the forward facing dinette seat.

The Rest Easy® multi-position lounge provides unmatched seating flexibility and comfort. At the touch of a button this comfortable couch converts into a relaxing recliner with a pullout ottoman. Touch the button again for a comfortable bed. Select models include fold-down armrest beverage holders and all models can be upgraded with UltraLeather HP upholstery and dual controls.

TRUEAIR

Escape from the summer heat and into the precision climate control of TrueAir® residential central air conditioning. Powered by a Coleman®-Mach® central

cooling unit, TrueAir offers superior environmental control throughout the coach. The cooling unit is located in the basement to provide a lower vehicle profile, reduce noise and eliminate roof runoff from A/C condensation. This location is also much easier to service and provides a lower center of gravity than roof pod units. With the standard Home Comfort Plus package, you get an auxiliary automotive heater, insulated power roof vents in the bath and galley, and a heat pump to help warm your coach on cool mornings, without using the LP furnace.

Keep your electrical systems running smoothly even when operating your central air conditioning on 30-amp. shoreline power. The PowerLine® energy management system

monitors onboard 110-volt electrical usage to minimize the nuisance of tripped campground circuits by postponing secondary electrical loads during periods of heavy usage. As demand is lowered, PowerLine automatically returns power to secondary appliances and systems.

ONEPLACE Eliminate the runaround with the OnePlace® systems center. It brings together frequently used switches, gauges and controls so you can check and operate your systems at a glance.

Large, clearly labeled dash controls and switches make everyone feel comfortable behind the wheel of the SunCruiser. Conveniences such as map lights, a center sunvisor and available powered driver and passenger sunvisors come in handy on long trips. Navigational features include an available rearview monitor with one-way audio for easier backing and an electronic compass with a built-in thermometer. You can even add an advanced GPS system to keep you on course no matter where you go.

A passenger workstation provides an excellent surface for using a laptop computer or writing letters. It slides toward the passenger when needed or to access the hidden storage compartment.

The QuickConnect™ coupling valve provides quick, clean hookups with its easy-to-operate valve. It even has its own holster for easy storage.

Upgrade your listening choices with Kenwood Sirius® Satellite receiver.

High-altitude satellites deliver 100 channels of crystal-clear digital programming anywhere in the U.S. with no signal fades (Sirius Satellite radio programming is complimentary with your first year of ownership).

The service center houses a heated holding tank, plus the major plumbing connections and service points, for your convenience. The hassle of fitting hoses and cords through tiny access holes is eliminated by the QuickPort™ service connection hatch. QuickPort supplies an easy-to-use slot that holds the hose and cords, even with the bay door shut. This same compartment contains an exterior wash station for rinsing off muddy gear and toys before tracking dirt into the coach.

Stay informed and entertained.

Winnebago Industries® engineers worked closely with the radio manufacturer to create a radio specifically for motor home applications with large buttons and knobs that are easy to use. The RV Radio® includes an AM/FM stereo, CD player, cassette deck and a weather band. Save the coach batteries by flipping the radio power switch and running it off house power. Two remotes – one handheld, one steering wheel – are provided for your convenience.

Itasca owners are falling in love with two-way radios and now they're available with every SunCruiser. The four multi-channel radios have up to a five mile range and recharge from the house batteries at their built-in charging station. The nickel-metal hydride batteries provide up to 15 hours of standby and 90 minutes of talk time on a single charge.

The StoreMore® slideout system provides abundant storage that is easy to access. Exterior StoreMore compartments extend with the slideout so you do not have to crawl on your hands and knees to get your gear. These compartments are big enough to hold large or odd-shaped items like golf clubs or a folding ladder. Compartment doors activate the compartment lights and feature single-paddle latches and gas struts for easy opening.

TRUE LEVEL HOLDING TANK MONITORING SYSTEM

Winnebago Industries exclusive TrueLevel™ holding tank monitoring system incorporates Mirus™ detector cell technology to ensure accurate fresh and wastewater tank level readings. Mirus detector cells produce a micro-electrical field that detects liquid levels from outside the tank. No more probes to corrode or clog. Just true, accurate readings time after time.

Have more fun with the exterior entertainment center. An AM/FM stereo radio, CD player, two speakers, 12-volt powerpoint, TV jack and a removable table are all included. Expand your options by using the portable satellite dish connection located in the electrical service center (satellite dish not included).

- The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please check with your dealer for further information.
 - Suncruiser floorplans feature a wide-body design — over 96". In making your purchase decision, you should be aware that some states restrict access on some or all state roads to 96" in body width. Before making your purchase decision, you should confirm the road usage laws in the states of interest to you.
 - The load capacity of your motor home is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motor home.
 - Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
 - Actual towing capacity is dependent on your particular loading and towing circumstances which includes GVWR, GAWR, and GCWR as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
 - Not all items available in combination.
 - See your dealer for complete warranty information.
 - See separate chassis warranty details.
 - Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.

- Winnebago Industries® continuing program of product improvement makes specifications, equipment, model availability and prices subject to change without notice. Comparisons to other motor homes are based on the most recent information available.

Not all motor homes are created equal. SuperStructure® is the term given to Winnebago Industries' structural motor home design and construction. Rather than a single component, it is the culmination of design integration that incorporates steel and aluminum sub-structures, composite-design laminated floor risers, interlocking joint technology and Thermo-Panel® floor, roof and sidewalls to form an incredibly strong, durable vehicle body.

A Laminated risers feature a welded aluminum core for superior strength and provide a stable base for the floor structure and storage compartments.

B Critical steel components are treated using an advanced electrodeposition coating process that provides superior corrosion protection.

C The foundation substructure assembly is precision-aligned to maximize strength and cross-coach support as well as durability.

Interlocking joint construction utilizes advanced aluminum structural components to create integrated floor-to-sidewall and sidewall-to-roof joints. This design effectively distributes the weight of the walls and roof, making a stronger and more durable body than competitor designs that require screws to carry the weight.

We invented Thermo-Panel® sidewall construction and, over the years, have perfected this innovative composite construction process. It combines an exterior fiberglass panel, high-density block foam insulation and welded aluminum support structures to create some of the strongest, most durable and lightweight sidewalls in the industry.

Built to a higher standard. The Suncruiser features a crowned, one-piece fiberglass roof, backed with a 10-year limited parts-and-labor roof skin warranty. Fiberglass offers superior strength, attractiveness and durability over the rubber roofs found on many competitive models which can chalk, streak and degrade over time. Fiberglass also provides increased puncture and tear resistance.

1-year-old Itasca fiberglass roof

1-year-old competitor's rubber roof

Committed to service. We back our motor homes with the industry's best service after the sale.

- 12-month/15,000-mile basic limited warranty
- 36-month/36,000-mile warranty on structure
- Standard 10-year limited parts-and-labor roof skin warranty
- Complimentary 24-hour roadside assistance program
- TripSaver Fast Track Parts. TripSaver guarantees that in-stock warranty parts ship directly to your dealer within 24 hours.
- National dealer service network

Recognized quality. Recreation Vehicle Dealer Association members annually rate RV manufacturers on the quality of their products, and sales and service support. Winnebago Industries has achieved the coveted Quality Circle award every year since its inception, the only RV manufacturer to do so.

WARNING: Joining WIT has been known to cause excessive fun. Winnebago-Itasca Travelers (WIT) is a club for owners of Winnebago Industries motor homes. WIT is a great way to meet people and offers you:

- Caravans and rallies
- Local and state group activities
- RV travel benefits
