Wildcat
Maxx LITE

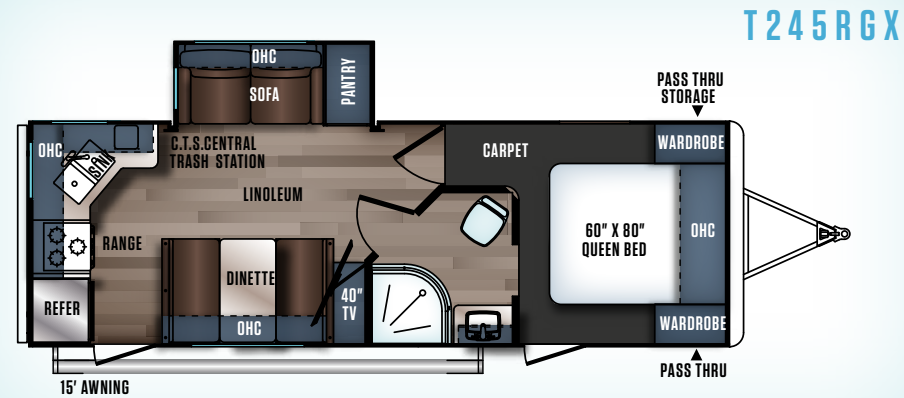

The Wildcat Maxx Lite is constructed with the same 2" vacuum bonded sidewalls as our standard travel trailers and 5th wheels. We didn't cheapen our build like most of our competition that uses 1" walls and less materials to achieve "light weight." You don't have to feel like you are getting a "cheaper build," to get a lighter weight travel trailer.

The Wildcat Maxx Lite consists of shorter models. We use the same real Hardwood Cabinet doors with residential Hidden Hinges. We use the same Furniture, the same MAXX-Bright LED interior and exterior lighting, the same Trekk Residential Flooring completely glued to our 1-Piece Dynaspan floor decking, the same 60" x 80" Residential Mattress, and the same Maxx Insulation Package.

CLIMATECH® COLD WEATHER ALL SEASONS INSULATION PACKAGE

- Underbelly has reflective astro-foil insulation + R-7 fiberglass under each holding tank. Also included is a 12-volt tank heater for each of the holding tanks
- The floor has a reflective astro-foil insulation + R-7 fiberglass insulation
- The ceiling, front wall and rear wall have a reflective astro-foil insulation + two layers of R-7 fiberglass insulation
- The side walls, three sides of the slide-out, the raised upper deck of all fifth wheels and all raised bunk beds are vacuum-bonded, aluminum construction with R-10 high-density block foam insulation
- The slide-out floor also has a layer of reflective astro-foil insulation on top of 1.25" plywood decking
- On all fifth wheels, the outside storage compartments have an actual heat duct blowing hot air from the furnace directly into the storage compartment
- Every Wildcat Maxx comes with a vented attic to allow moisture to escape in the winter and heat to escape in the summer
- Every Wildcat Maxx comes standard with a 35,000 BTU furnace (30,000 BTU on Maxx Lite)

(It is important to remember that astro-foil insulation has a calculated "R" value of 38 at an ambient temperature of 80 degrees Fahrenheit.)

HEAVY-DUTY ALUMINUM FRAMING

We use heavier tubing than most of our competition. Our vacuum-bonded, 2" side walls are fully insulated with R-10 Block Foam insulation and each opening is 100% framed on all 4 sides with welded aluminum

DOUBLE INSULATED CEILING WITH REFLECTIVE FOIL, STANDARD

Our products are designed with the latest insulation products and are engineered to withstand extreme environments. Insulation and reflective foil is added above the protective water barriers on the bottom of each unit. We also add vented areas in the ductwork to heat the underbelly of each unit.

ASTRO-FOIL INSULATION IN CEILING, FLOOR, UNDERBELLY AND SLIDE OUT FLOOR

Spaced Age Astro-Foil Insulation™ Our system has a calculated reflective R-Value of 38 at an ambient temperature of 80° Fahrenheit and can double your heating and cooling efficiencies.

PRE-DELIVERY INSPECTION FACILITY

20,000 square feet of quality assurance. The bare essentials for a premium product. This state-of-the-art facility gives immediate daily feedback to production for quality assurance in every unit built.

Specification Definitions

GVWR (Gross Vehicle Weight Rating) - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

UVW (Unloaded Vehicle Weight)* - is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 per ton). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity.

** Estimated average based on standard build optional equipment

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities.

The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.

All information contained in this brochure is believed to be accurate at the time of publication. However, during the model year, it may be necessary to make revisions and Forest River, Inc., reserves the right to make all such changes without notice, including prices, colors, materials, equipment and specifications as well as the addition of new models and the discontinuance of models shown in this brochure. Therefore, please consult with your Forest River dealer and confirm the existence of any materials, design or specifications that are material to your purchase decision. Litho.
