

Four Winds

*and Four Winds Five Thousand
Widebody Motorhomes*

State-of-the-art technology gives *Four Winds* and *Four Winds Five Thousand* motorhomes their superior edge in ride, handling, stability, comfort, and convenience.

We build our Class 'C' motorhomes with a longer, "limousine-style" wheelbase and a full rear frame extension for a safer, smoother, more comfortable ride.

Fully-welded tubular aluminum-cage construction in the roof and sidewall gives superior body strength without added weight and a lower center of gravity. Fully-laminated roof, walls, and floor utilize the newest vacuum-bond technology for strength and energy efficiency.

All exterior storage compartments are seamless Roto-Cast® compartments which virtually eliminate leaks and corrosion. We locate the generator on the road side, shielding you from noise and exhaust when you're enjoying your standard patio awning. And our "Camper's Corner" is typical of the extras we put into every *Four Winds* and *Four Winds Five Thousand*. For easy accessibility, the AC power cord and water connections are all conveniently grouped at the driver's-side rear corner of the vehicle.

When you own a *Four Winds* or *Four Winds Five Thousand*, you'll know your motorhome was designed and built to the highest standards, using the finest materials and the latest technology.

Many bedrooms feature walk-around queen beds with high-quality mattresses. Or, if you prefer, twin beds are available in some models. Spacious wardrobes, shirt closets and convenient night stands provide ample storage space for all the clothes you'll want to take along when you travel.

THE FIVE THOUSAND is the perfect vehicle for those who prefer a shorter motorhome with greater economy.

Like the *Four Winds*, the *Four Winds Five Thousand* features bathrooms carefully designed for maximum efficiency and convenience, with generous storage and quality appliances.

ONE GOOD LOOK and it's clear why the *Four Winds Five Thousand* is the value leader among Class 'C' motorhomes. You get all of our advanced engineering and construction features in a motorhome that's priced to fit just about any budget. Like the *Four Winds*, a *Four Winds Five Thousand* features extra-large windows and an abundance of lighting fixtures for beautiful views and bright, cheerful living. Warm oak cabinetry and our stylish fabrics add a residential feeling to the coach. Generous storage includes spacious closets, wardrobes, and drawers featuring high-quality roller guides, so you can carry all the clothes and supplies you'll need.

High quality, durable designer fabrics in stylish colors assure you of lasting beauty for years to come.

State Fair Taupe

State Fair Wintergreen

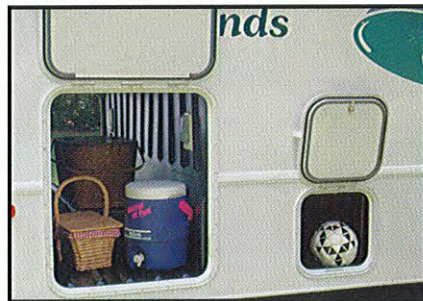

State Fair Blue

The *Four Winds* models include ceiling ducted air conditioning, as well as in-floor, residential-style heating systems for maximum comfort in any weather. The optional cab-over entertainment center, available on both *Four Winds* and *Four Winds Five Thousand*, locates the large color TV (25" in *Four Winds*; 19" in *Four Winds Five Thousand*) where everyone can see it, adds even more storage, and still provides comfortable sleeping accommodations.

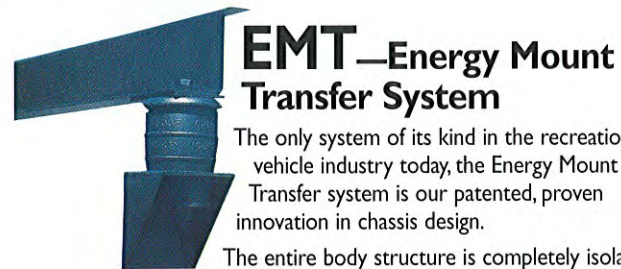

All galleys are designed for maximum efficiency and convenience. The *Four Winds* models feature a large residential-style microwave, double-door refrigerator, and a three-burner gas range with high-output burner.

Spacious, well-lighted bathroom areas offer complete privacy with an abundance of storage space. High-quality appliances contribute to the luxurious, residential feel, while assuring you of long trouble-free operation.

All models include generous exterior storage. The *Four Winds* models, with their full-basement storage compartments and radius-corner doors (including a huge rear pass-through compartment), give you easy access to all the gear you'll need to bring along.

EMT—Energy Mount Transfer System

The only system of its kind in the recreation vehicle industry today, the Energy Mount Transfer system is our patented, proven innovation in chassis design.

The entire body structure is completely isolated from the motorhome chassis by a series of carefully placed, heavy-duty, high performance rubber grommets. The EMT system increases ride comfort and stability and improves road handling, while virtually eliminating the transfer of vibration and road noise to the interior of the coach.

This unique system is another example of the state-of-the-art technology and superior design and construction that are features of every *Four Winds* and *Four Winds Five Thousand*.

Product information, specifications and photography in this brochure were as accurate as possible at time of printing. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities and weights are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada.

Vehicle Loading—Every effort has been made to provide the greatest number of options for the vehicle owner. With these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the vehicle.

Unloaded Vehicle Weight (UVW) based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting UVW from gross vehicle weight (GVWR) and includes fluids, options and cargo.

Spacious overhead cabinetry w/raised-oak cabinet doors
User-friendly hook-ups conveniently grouped in the driver-side rear section (*most models*)
Windshield privacy curtain

THOR'S

“2 + 2” WARRANTY

2 year limited structural warranty and 2 years on major components

The best protection in the RV industry!

See your dealer for all the details.
