Setting the Standard in Motor Home Quality.

**Fleetwood® prototypes are exposed to thousands of miles of durability testing. Those components that don't survive are redesigned until they do.** This sets our standard in safety and durability.

**Royal Tuff-Ply roofing technology is one of the most durable roofing materials on the market and also reflects sunlight to reduce chalking.** White roof material minimizes heat build-up, keeping the temperature cool and comfortable.

**Reliable TuffPEX® plumbing runs throughout each vehicle creating a durable seal on all internal tubing. TuffPEX® assures water flow and functions in colder temperatures.** The TuffPEX® system is an industry leader in quality plumbing.

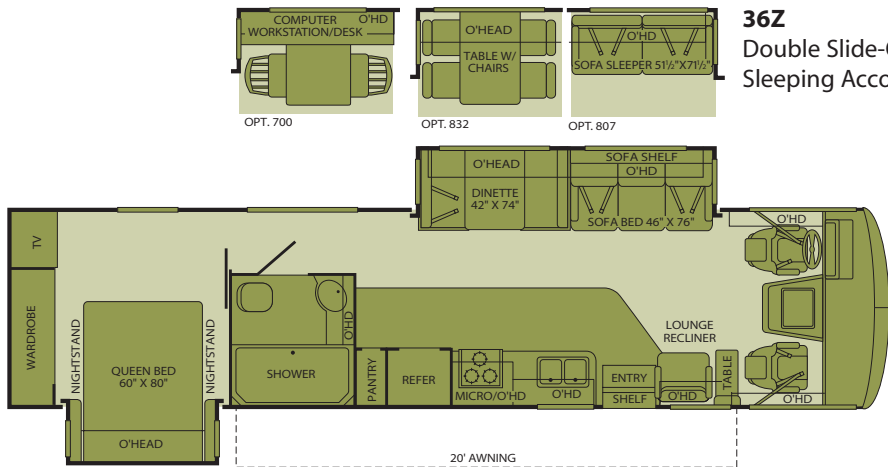

**For each outer wall, Fleetwood uses one seamless, solid piece of its exclusive Tuff-Coat® fiberglass composite. It resists UV rays, cracks and impacts.** Our products look newer longer and that's a big plus at resale time.

**To assure a strong, weather-resistant structure, Fleetwood Vacu-bonds® all sidewalls, floors and ceilings to a durable aluminum or steel frame.** The Vacu-bond® process is unmatched by many competitors.

**Fleetwood's patented Power Platform supports the body with a rigid frame that reinforces the chassis to make it even stronger.** This allows Fleetwood to offer triple slide-outs.

**Fleetwood sinks and shelves are designed to handle full-size kitchenware.** Few competitors can say the same.

**36Z**

- GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motor home. The GVWR is equal to or greater than the sum of the unloaded vehicle weight plus the cargo carrying capacity.
  - GAWR (Gross Axle Weight Rating) is the maximum permissible loaded weight a specific axle is designed to carry.
  - Base Weight is the estimated weight of the motor home without fuel, options, water, cargo or passengers.
  - GCWR (Gross Combined Weight Rating) is the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may be different. Refer to Fleetwood and chassis manufacturer's manuals for complete information.
  - Length taken from front bumper to rear bumper (excludes accessories).
  - Excludes safety equipment and awnings.
  - Motor homes feature a body-width over 96" which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.
  - Tank manufacturer's listed water capacity (WC). Actual propane capacity is 80% of water listing as required by the safety code.
- † The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing. Hitch receiver ratings expressed are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependant on the weight of the towed load. Consult with hitch receiver manufacturer for further information.
