Great West Vans – The all new Sprinter Legend line for 2012.

Welcome to the world of Great West Vans. This brochure illustrates our three Sprinter Legend models for 2012 and highlights what's new, what's different and what's unique in the world of Class B motor homes.

For 2012, we have expanded the Sprinter Legend in to 3 very different models from the very popular Sprinter Legend now completely upgraded to the Sprinter Legend *ex* with the latest technology in heating, hot water and climate control. If you have any questions or could use some advice, just let us know, it will be our pleasure to assist.

What to look for in a Class B motor home.

We receive many enquiries every day regarding the features and options available. The most common questions are:

- How long is the bed?
- How big is the air conditioner?
- How long is it?
- Are there screens on side and back doors?
- How big is the fridge?
- What heating system do we offer?
- What is the fuel economy like?
- How high is it?
- How wide is the aisle way?
- Is it well insulated?

The list goes on but these are the questions we hear most often and many times, the questions come from meeting a current owner, visiting our web site or reading the phone number on the back of a model travelling down a highway.

We always recommend doing the research and looking at all the options available today. Our unique development program is continuously working with customers to search for new ways to improve our models. For us, this is the only way to develop, with input from experienced owners who have a unique insight in to the good and the bad things in RV'ing. 2011 has been all about development, listening to customers and allowing customer needs and suggestions guide us. We also take great pride in taking forward the Mercedes-Benz attitude towards quality, innovation and customer experience.

Wheelbase	170"	170"	170"
Fuel Consumption (mpg)	21-22	19-21	19-21

The Sprinter Legend is built on one of the world's cleanest and most environmentally friendly platforms available. The Mercedes-Benz 3500 chassis offers great fuel economy at **20-22 mpg**, quiet ride and powerful responsive handling.

We continue to provide new and unique features not found on other Class B motor homes and for 2012 move forward with options that simply must be seen.

When you step inside the Sprinter Legend, you will immediately appreciate the thoughtfulness that has come from constant improvement and customer suggestions. The way the step feels and the placement of the grab handle, the small things like the placement of the microwave, coffee maker and fridge, all where you can reach them easily. Then you will note the sink and stove are on the side that looks out through the large windows over the activity area under the awning.

On a warm day, you will leave the side door open and close the Side Screen Door, an exclusive feature with a Great West Van.

2012 Sprinter Legend

- Innovative Sliding Screen Door, only in a Great West Van.
- Safe wide side door entry steps.
- Solid wood cabinetry.
- The most comfortable seats.
- Everything placed where it should be, in easy reach.
- Exclusive Tri-Fold Electric Sofa can power forward in the upright position creating a huge cargo area behind the sofa.
- Dual rear wheels – improved stability.

The third seat option seat slides, tilts and swivels making this a very comfortable addition with 2 armrests. There is also a large side opening window with screen

As the day comes to an end, you will use the LED light dimmer to adjust the lighting to suit whatever you're doing. When you try the seats and the sofa, you won't want to get up, they are really comfortable (very high-tech). The front Mercedes-Benz swivel seats will be appreciated on the longer trip or a just a run to the store.

In the rear floor there is a large trunk for shore cables and other items. There are also two containers for coach batteries.

The Exclusive Tri-Fold Sofa, powers forward to provide a huge cargo space or power down to the bed position from inside the cabin or from the rear doors. There is also a full 12" of clear space under the sofa allowing longer items to pass through the entire length of the cabin. Switches are located at the rear and inside the cabin making things very easy.

There is accessory rear screen door to match the side screen door. You will be able to keep the air flowing and the bugs out anytime.

Sprinter Legend *e* extended

The Sprinter Legend *e* is a new variation built on the extended chassis. This model offers the same great options and features as the Sprinter Legend but with the extra 16" of rear cargo space. This space can be used to create a 7' bed with the included extension panel and cushion. The panel and cushion drop in to place easily and can be stowed under the Tri-Fold sofa. The extra space can also be used to carry up to 55 cuft. of additional cargo. Bikes, scooters anything you might need on your adventure.

The 12" of clearance under the Tri-Fold sofa is a great place to store everything you need for the adventure. Longer items can pass through the entire length of the cabin.

In a class by itself, the Sprinter Legend *e* has the same wheel base as the Sprinter Legend but there's more motor home to enjoy.

The third seat option and larger fridge add to the versatility of the Sprinter Legend *e* making this a great model to consider. Space, versatility and functionality are key factors in the design of this motor home.

Contact your closest dealer or contact us at the factory for more information.

Shipping Your Next Motor Home

Every model we produce is shipped across North America by truck. This is to ensure that every model arrives at its destination in great shape and there are no more miles on the odometer than necessary during pre-production and final pre-delivery inspection. No less than you would expect from Great West Vans.

All new for 2012, extended length

Move up to the extra space offered by the Mercedes-Benz Extended chassis, 16 inches longer giving you the extra space for cargo behind the Tri-Fold Sofa or Twin Beds. This special variant of the Sprinter Legend has the same wheel base and options as the 2012 Sprinter Legend but more, much more motor home. The **Sprinter Legend e**.

Check with your dealer or contact us for more insight in to this great option.
 9'8" High, 24' 6" Length, 8' 0" Width (including mirrors), 170" wheel base.

New Flexible Bathroom

The all new flexible bathroom makes it easier to take a shower, change and get out there and see the sights.

You will be able to open one large door to use the washroom or, open both doors which connect to the opposite side of the cabin creating a changing area. This new layout now provides more elbow room in the shower and more places to put things. From the changing area, you have easy access to the bathroom sink and medicine cabinet with mirrors on both sides. This will be appreciated by those who prefer a little privacy.

Customers have been telling us for some time that they need to be able to use the shower, change and not have to do it in the open aisle space with all of the interior blinds closed. Now we have it to offer. The front cabin is still usable with the side door open and Side Screen Door closed. The rear sofa bed and TV are also still usable while the bathroom is in use.

The Fantastic Fan which is reversible, thermostatically controlled and rain sensing, is right above the bathroom area to keep the temperature just right.

New Third and Fourth Seats

The model starts with a third seating position in place of the hanging closet. If you choose the seat can be removed and a closet added in to the same vehicle. You can also consider a third and fourth seat option.

The third seat is designed to offer everyday passenger comfort. Adjustments allow the seat to slide forward and backwards, recline and swivel within the space available. Two armrests add to the comfort and feeling of luxury. The Sprinter Legend maintains the feeling of openness and functional use of the available space where the additional seat blends in to the superior interior. Customers have appreciated having the option of one additional seat, two additional seats or the original hanging closet. Elegance that must be seen.

New Larger Fridge

From mid-2011, the 2012 Sprinter Legend now has a 5.0 cuft, single door, 3 way, auto switching refrigerator. The full set of controls and automatic functions adds to the ease and functionality of the Legend

The Exclusive Sliding Screen Door

The Sliding Screen Door is easy to open and close and keeps the bugs out while still allowing air to flow through the cabin. This is a real benefit in being able to have the door open, be part of what's happening outside and not enclosed in the cabin.

There is an accessory rear screen door also available. Simple and easy to operate you won't find on another Class B motor home with this feature unless it's another Great West Van model.

New Standard Automatic Coffee Maker

If you like your coffee in the morning this will make a difference. Fully programmable, just set it up at night and you will be all set in the morning. Not many hotels will give you this option. Front loading and easy to clean, this model was specifically selected to make things easy and simple.

Special Needs

We have assisted many customers by making small modifications to our floor plans to accommodate wheels chair lifts, scooter lifts and medical equipment. If you have a need that our current floor plans do not meet, let us know or contact your closest dealer for advice. We may have a solution that makes all the difference.

Newsletters

We publish a Newsletter every 4 to 6 weeks to highlight our ongoing development efforts and new technologies. If you would like to receive a copy, just send us an email address and we will be pleased to add you to our Newsletter Contact List. We use Constant Contact to send News Letters so that you will have an easy and secure way to unsubscribe if you wish. We use 'permission based' contact practises and do not share or sell your information to any other party. If you have a suggestion or question, please feel free to contact us at sales@greatwestvans.com You might be surprised how quickly we respond. We even pick-up the phone if you call.

extra-large fridge**

extra technology – extra Wi-Fi connectivity

**extra parking simplicity – extra comfort –
extra options – extra enjoyment – exclusive**

extra in every way – exciting – extraordinary!

The development of an all new Class B Motor Home, in a class of its own

Sometimes wonderful things come from a simple conversation with someone who has a great deal of experience to share. In February of 2011, a customer explained the need for extra space in a Class B motor home to carry 2 hi-tech bicycles. The only way to provide more space was to consider the extended Mercedes-Benz chassis to provide 16" of additional space. The conversation continued over several weeks with the discovery of many features that could be added to accommodate the original need and enhance the functionality and ambiance of the entire motor home. So we proceeded to produce the first model of the Sprinter Legend on this extended chassis and continued to refine the model with the help and advice of one other customer. From this, we received many more enquiries and we started similar conversations that lead to having 4 individual customers basically join our development team and work with us as if they were in the factory every day. We owe a great deal of thanks to those who helped us start this process and to those who today continue to participate in such an open way in the development of the most advanced Class B motors home available. We have learned that the only way to develop continuously is to provide you the very best service and the willingness to have you involved in what we take great pleasure in doing.

- Rear parking sensors.
- Permanently attached macerator pump with shut-off valve.
- Wi-Fi antenna, booster, wireless router.
- Cell phone signal booster.

Simple selection of floor plan, packages and options makes planning your motor home easy.

ADDITIONAL 55 CU.FT. OF CARGO SPACE

ex

Starting at only slightly more than the 2012 Sprinter Legend, with fixed bed and spring mattress, new diesel Hydronic heating and hot water system and 6.0 cuft double door fridge.

The 2012 Sprinter **ex** offers more space, the opportunity for longer beds and a new array of technical features. We take great pride in taking forward the Mercedes-Benz platform to bring you this very special Class B motor home. From the small things like rear parking sensors to diesel powered hydronic heating to 6.0 cuft fridges, we believe you will be surprised when you step inside a Great West Van model.

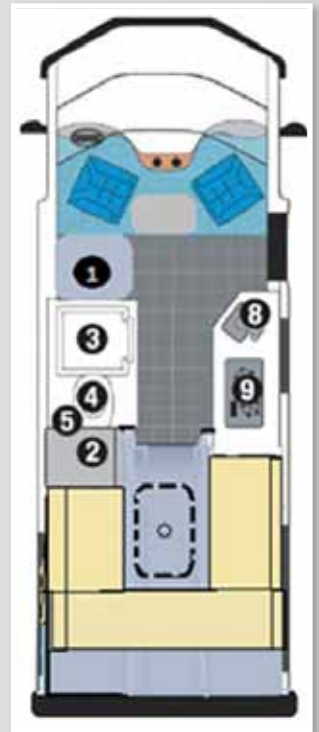

We will be developing a number of videos on this model to really show you the features in detail. Send us an email and we will be pleased to send you the links to the latest videos. The first of these videos is now available on YouTube.

Simple Floor Plans to Fit Your Needs

The first option is to have a simple platform queen size bed positioned on a platform with a full 11" of storage under the bed.

The Tri-Fold Sofa is positioned 16" forward of the back doors to provide permanent cargo space at the rear while using the sofa for travelling. When lowered to the bed position, the sofa extends the bed length to 7 feet. There is still 12" of open space under the sofa.

The Twin Bed plan provides two 7' beds that convert in to a dinette arrangement with or without a center table.

Solid Wood Trim

Light Maple

Cambridge Cherry

Seating Surfaces

Champagne

Cashew

Ocean Breeze floor tile

Confetti carpet

French Linen carpet

Coral Sea floor tile

Two floor tile options in Coral Sea or Ocean Breeze and two carpeting options in Confetti or French Linen.

If you would like to receive samples of the carpet and tile options, just let us know.

Our recommendation is always keeping the interior light and bright, so we like the Coral Sea floor tile in combination with the French Linen carpet. There is something about the effect of the LED lights and these colors that add warmth and an inviting atmosphere.

Talk to your dealer or contact the factory if you have any questions regarding the new list of options available on the 2012 Sprinter Legend *ex*. You will find that there are many options specifically suggested and selected by customers as those rarely offered but are great to have.

Under body Spray Foam is a great idea reducing road noise and adding insulation from heat and cold.

The macerator pump is arranged in an easy to use location with adapters for various connections.

**Thoughtful design,
carefully selected materials
and experienced customer input and
participation has created the all new line of
Sprinter Legend Motor Homes.**

The open feeling of the aisle, galley facing the camping side and clean lines with a completely screened side door are key features in the Sprinter Legend series of motor homes.

Third Seat: The optional third seat is designed for long trips and a comfortable ride. The opening window is also a nice touch.

The porch lights are now **motion sensing** LED lights with two positioned on the

driver's side and one on the camping side. The added feeling of security is important and when arriving at a campground late in the day, having the driver's side illuminated makes hook-up nice and easy.

Water Filter? Absolutely, with separate faucet and shut-off, filter change indicator light and filters widely available.

See the complete list of options available.

The Extra 16" in Length

The extra space allows you to carry more cargo, an extra 55 cuft. Of space allows you to carry all kinds of things that shorter models can't. Here, two adult hi-tech bicycles are loaded.

The rear of the Sprinter Legend ex is equipped with a bed extension, a great place to store items during the day but at night, this extends the bed to a full seven feet. No matter if you are tall or not, having seven feet is a wonderful thing.

The extension cushion is laid in and easy to remove and stow under the sofa as is the shelf panel rated as being able to hold up to 150 lb's in the center. Just a simple lift out drop in design makes it easy to use the extra space the Sprinter Legend *ex* offers.

The choice is yours, more cargo, seven foot bed in both Tri-Fold sofa and Twin-Bed models and the flexibility to make it do what you need it to do. The deep 4 layers of foam make this the most comfortable of beds.
