CONSTRUCTION

1 | ROOF

- » Double batten insulation layered with radiant foil
- » Screw-mounted plywood decking topped with premium quality PVC
- » No treatment required! Will not chalk or spot
- » Heat reflecting properties keep coach cooler in the summer

2 | SLIDE OUTS

- » Best in class slide height and depth
- » Flush floor and above floor slides
- » Accu-Slide cable system with four points of compression
- » Laminate components plus 3M flashing tape along corners to prevent leaks

3 | SIDEWALLS

- » Lightweight, double-welded aluminum walls
- » Slide roof frames laminated with rigid foam insulation

4 | MAIN BODY

- » Built with 12" steel I-beams
- » 7,000 lb. axles with self-adjusting brakes
- » Aluminum wheels with nitrogen-filled tires
- » Industry-leading unique heating system

5 | DOORS & LOCKS

- » Oversize entrance door with large window, built-in screen doors, and integrated window shades
- » Double-insulated passage and storage doors with slam latches on secure and convenient key-alike system

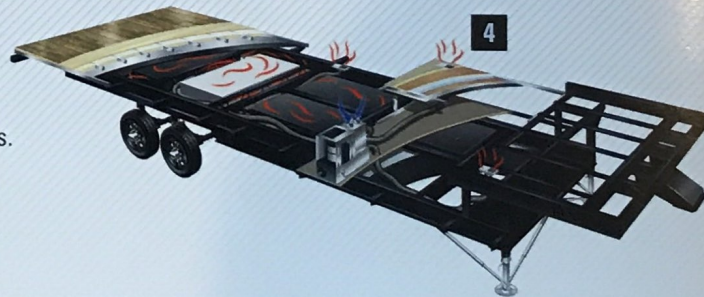

6 | FLOORS

- » Double-welded framed floors
- » Insulated with rigid foam wrapped in radiant foil, anti-puncture Darco material, and strengthened with an overlapping double layer of laminate
- » Insulated garage door

INDUSTRY-LEADING HEATING SYSTEM

Oversize 4-inch heat ducts run from the furnace down to the fully enclosed underbelly and wrap around the tanks suspended between the chassis I-beams. Holding tanks are warmed by the forced air heat which prevents freeze-ups.

A return at the end of the tank connecting back into the coach provides the necessary air flow, eliminating the need for a pressurized system.

CONSTRUCTION & FEATURE HIGHLIGHTS

TOP FEATURES

-  **PVC ROOFING MEMBRANE**
-  **SPACIOUS INTERIOR**
100" Wide body, 42" deep main slides, 84" tall slide-out ceilings.
-  **FUEL TANK & DISPENSER**
30 gallon fuel tank for toys & generator.
-  **POWER AWNING**
Protected with FLXguard® and LED lighting.
-  **LINO FLUSH FLOOR SLIDE SYSTEM**
Seamless transition between floors (no carpet).
-  **3,000LB RATED GARAGE CAPACITY**
Based on overall GVWR.
-  **15K A/C RESIDENTIAL RETURN AIR**
Superior cooling with quiet operation.
-  **4 OR 6-POINT AUTO ELECTRIC LEVELING WITH JT STRONG ARMS**
Quickly & safely stabilize your RV.
-  **5,000LB RATED TIE DOWNS**
Safely secure your cargo with tie downs secured to the frame.

1 ROOF DESIGN

Double batten insulation with a layer of radiant foil extends from the bottom of the rear wall to the bottom of the front and is capped at both ends. The plywood decking is secured with screws and topped with a PVC roof that does not chalk, streak or need yearly conditioning and features heat reflecting properties that help keep your coach cooler in the summer.

2 SLIDE OUTS

Slide outs are constructed with laminated components that include 3M flashing tape along the corners to help prevent leaks. Superior wall, roof and floor construction feature added insulation and allow for taller and deeper slides creating a comfortable, open and spacious environment. Flush floor and above floor slides feature the Accu-Slide cable system providing four points of compression when placed in the "In and Out" positions.

3 LAMINATED SIDEWALLS

Each wall and slide roof is constructed using double-welded aluminum frames and is laminated with rigid foam insulation. For a superior wall construction.

4 MAIN BODY

The main body is built with 12" steel I-beams and features 7,000 lb. axles, self-adjusting breaks, and aluminum rim wheels with nitrogen-filled tires. The underbelly is fully enclosed and designed to prevent freeze-ups by containing the heat that is circulated around the suspended holding tanks by our industry-leading heating system.

5 DOORS & LOCKS

An oversize entrance door features a large window with an integrated shade, and a built-in screen door. The double-insulated passage and storage doors include slam latches (most doors) and are also equipped with a key-alike system for added convenience and security.

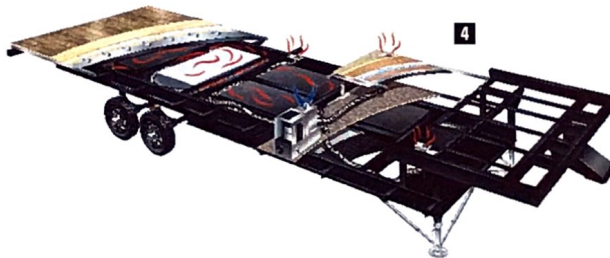

6 FLOORS

Double-welded framed floors are insulated with rigid foam, wrapped in radiant foil and anti-puncture Darco material and strengthened with an overlapping double layer of laminate. With insulated garage floor.

 **ZERO DEGREE TESTED**

Highland Ridge RVs withstand the harshest of environments. We put our products into a zero degree chamber for five hours.

 The results speak for themselves.

HIGHLAND RIDGE PRODUCTS HAVE A UNIQUE AND INCREDIBLE HEATING SYSTEM.

It starts with a 4-inch heat duct from the furnace down the underbelly—double the size of some of our competitors. Our tanks are suspended between the underbelly I-beams and surrounded by the 4-inch heat duct. This allows us to warm the tanks by blowing forced air heat on them.

A return at the end of the tank connecting back into the coach provides the necessary air flow, eliminating the need for a pressurized system.

THE HIGHLAND ASSURANCE

We stand behind our products. At Highland Ridge RV, we are one of the few manufacturers that have a 3-Year Limited Structural Warranty.

MORE ROOM LESS WEIGHT

This is our mission at Highland Ridge RV. It drives us to innovate and revolutionize the RV industry and it's why our products are 10 - 15% lighter than the competition.

We pursue perfection through innovation and quality. Your RV experiences drive the evolution of our products in a constant state of improvement.

NAVISTAR
PROVING GROUNDS

Our products undergo a grueling 500 mile durability test. A battery of figure eights, inverted chatters, undulations, and staggered bumps will test and prove our workmanship.
