TRANSPORTATION INSTRUCTIONS

1. Prior to travel and after excessive braking, all wheel lug nuts must be checked for proper torque.
2. Torque readings must fall within the acceptable torque range (see chart above).
3. Torque specs must be checked by using a torque wrench.
4. If torque falls below the acceptable torque range, additional torque is required.
5. During travel, wheel lug nuts must be checked and re-torqued as required. After the first 10, 25 and 50 miles and then periodically during travel.
6. Failure to follow these instructions may result in wheel loss, an accident, or loss of control, resulting in death or serious injury.

VIN # (FULL 17 DIGIT VIN REQUIRED): 205897

Please sign and date below as acknowledgement of the above instructions. By doing so, you accept responsibility to check the lugs nuts as stated above and that the contracted transporter you represent is aware of this policy.
