Thanks to Celina, Heather and Amanda for making all the delicious shots!! Thanks to all the ladies who helped set up and clean up!! Thank you to Steve for keeping the memory of Robbie alive and for sharing some kind words about him. Last but not least the Blue Haven campers!! Thank you for dressing up and being enthusiastic. The outfits were amazing!! However three of you really stood out; Frank, Ava and Celina. You guys truly embodied the 50's down to the slick hair and Bobbie socks!! Congrats!! Can't wait to start planning for next year!!!

- **Kids Softball** - Once again we were lucky with the weather Sunday but very warm to play Kids Softball yet we had another great turnout of 20 kids. The game was close after 4 innings but the wheels fell off on the last two innings likely due to the heat and the "Ninja Turtles" pulled away and won 32 to 15 over the "Rugrats" . MVP honors going out to Cayden Paiement of the "Ninja Turtles" and Declan Ross of the "Rugrats" . Special honorable mention with a well played game to Brydon Ross of the "Ninja Turtles" and to Max Chase of the "Rugrats" . Hoping it is a little cooler for next week. In the next couple of weeks I will give more details on our season ending championship game followed by the banquet which will be on Sunday, August 28th. Wish to add that we would not be successful in having this activity for kids softball without the dedication and assistance of these coaches/ volunteers weekly and we thank you.

The race is split into legs, each leg requiring teams to deduce clues, navigate themselves to various areas, perform physical and mental challenges, and run from one spot to the next. Teams are progressively eliminated at the end of each leg, while the first team to arrive at the end of the final leg wins the grand prize!

URGENT ELECTRICAL REQUEST

We are expecting some **HOT** and **HUMID** weather this weekend.

- **PLEASE Run your WATER HEATER on propane**
- **PLEASE run your REFRIGERATOR on propane.**
- **PLEASE CHARGE GOLF CARTS AT NIGHT.**

Our guidelines state that our electrical system is designed to supply basic electrical usage only. We **DO NOT GUARANTEE** that every site will be able to run air conditioning. Please help us out so we can all have an enjoyable weekend. See Dave or Tim in the office with any questions. Here is an interesting article I found I reference to this:

BEFORE YOU BLOW YOUR "BREAKER"

Take a look at the chart below to add up the amperage requirements for these RV Appliances that are in almost every camper. It is surprising how fast the AMPS add up which causes breakers to trip. Knowing the AMPS of all the electrical appliances in your camper can help you manage electrical use and help prevent the inconveniences of "MY ELECTRICITY WENT OUT"

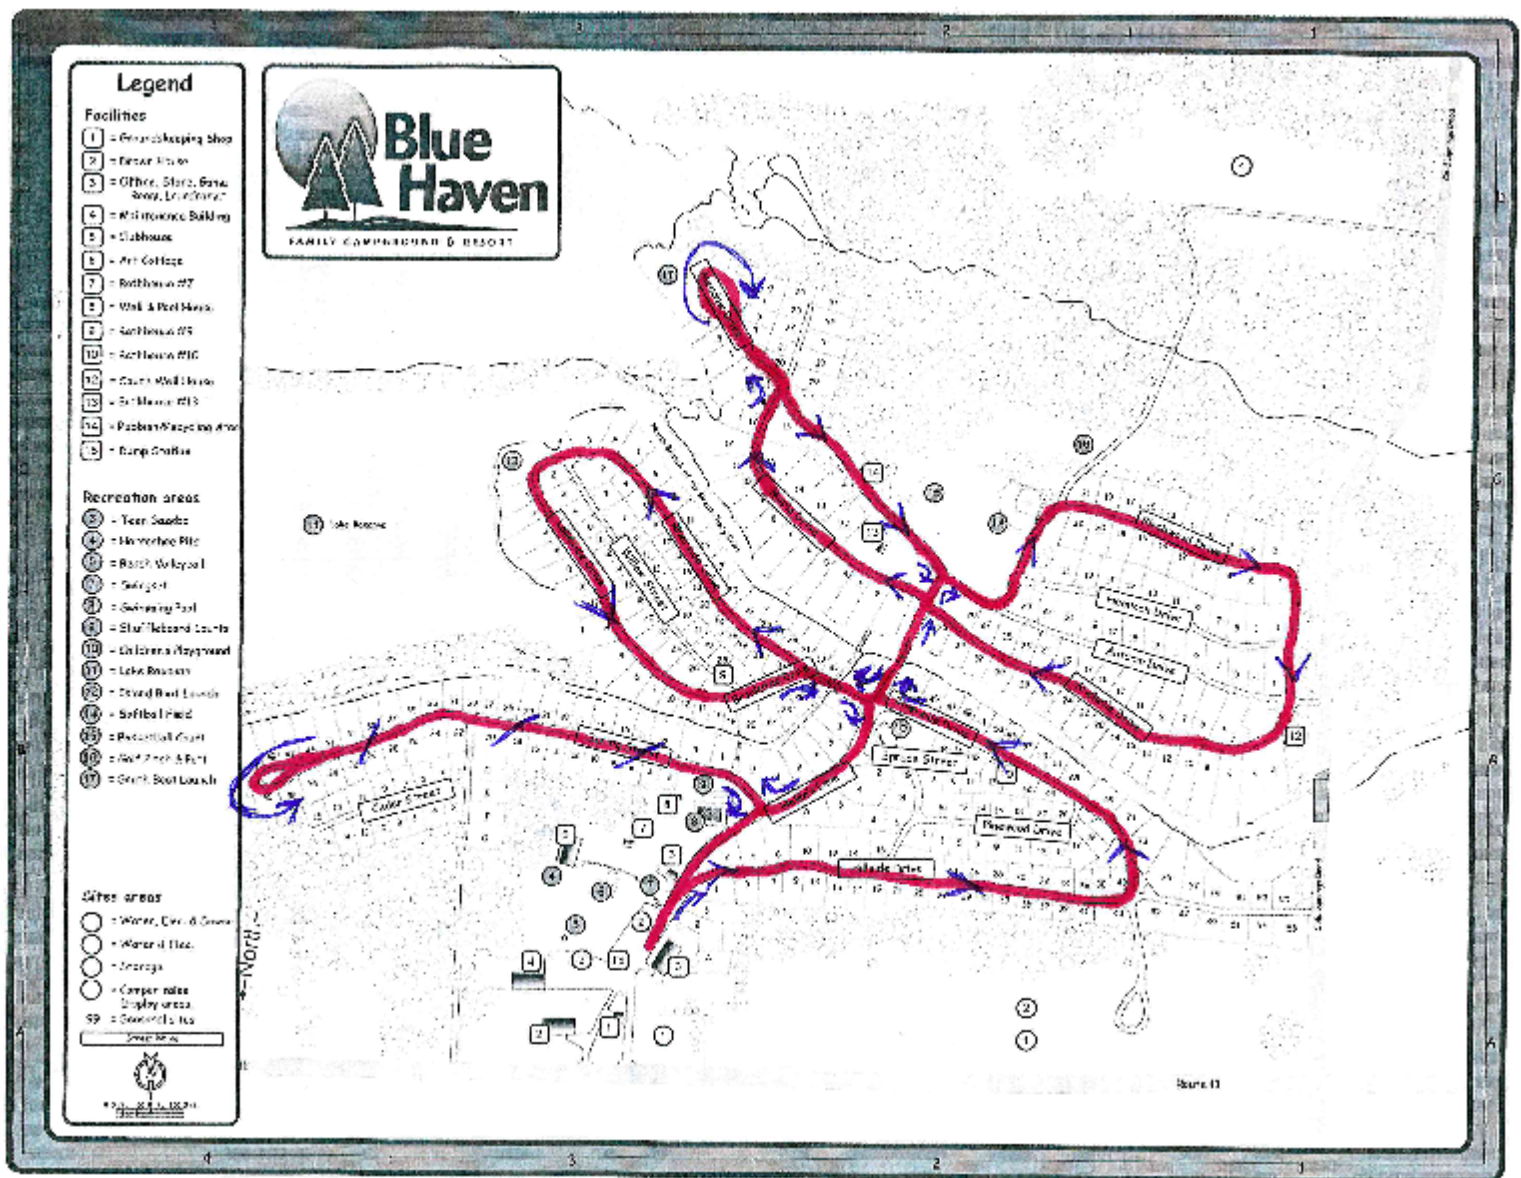

• Air Conditioner (15,000BTU)	16 AMPS
• Electric Water Heater	12.5 AMPS
• Microwave	12.8 AMPS
• Coffee Pot	9 AMPS
• Toaster	10 AMPS
• Hair Dryer	10 AMPS
• RV Refrigerator on electric	5-8 AMPS
• 12V Converter	5.5 AMPS
• TV	2 AMPS

You can easily see that in the morning if you start your Air Conditioner, with the water heater and refrigerator both on electric, then start your coffee pot, make some toast, and watch TV, you are pulling as much as 57.5AMPS when all are working at maximum capacity. Then if someone needs to fix their hair with a hair dryer, **LOOK OUT!** To compound the problem, each and every time a breaker trips, it weakens the Amperage protection initially rated for. In other words, if a breaker was originally rated for 30A, it might drop an Amp or two each time leading to extra unnecessary work to replace your equipment.

Fishing Tip - Did You Know? - Many fish, especially walleye and smallmouth bass, will track a crankbait and follow it right to the boat. Make a habit of stopping your lure 2-3 ft. from the end of your rod when you're finished retrieving your cast and pause it for a second, especially in muddy water. Walleye especially will often strike a lure right at the boat if you let them.
