Recovery Update

We are now in the recovery stage. We appreciate your patience as we move forward. There is still a LOT to do. If you have not already reached out with specific needs on your site related to the flood, please call or stop by either the Blue Haven office or our Tom Miller Road office to get these reported. We are collecting this information in a central location and prioritizing them as follows: **Safety / Health / Occupancy & Usability / Activity**. Some things to check that might not be obvious include (but not limited to):

- **Water into your camper** - Even though you may not have had water into the living area of your camper, we have found that several have had water into the insulation UNDER the camper - This is important as these can be difficult to dry out and if not addressed, can cause mold or rot.
- **Propane Tanks** - If your tanks were moved during the flood, check the hoses for any cracking or kinks. Also if your regulator was submerged, it will likely require a replacement.
- **Septic Lines** - Check your septic lines. If they need some attention, please let us know.
