

ATC CAR HAULERS
WWW.ALUMINUMTRAILER.COM

THE ATC EXPERIENCE

ATC has a solid reputation built on our Car Haulers. We've spent years developing and fine tuning the details and features of our current lineup of vehicle transports, and our full lineup of products are created to meet the needs of every car hauling customer. Our product line begins with the Raven Car Hauler - an economical, feature rich trailer, perfect for the weekend racer - and extends to our Quest bumper pull and gooseneck packages that are upgradable using a list of over 1,000 options. If our packages aren't exactly what you're looking for, we can work with you to design your very

own, one-of-a-kind custom trailer. Whatever your driving stripe, ATC can provide you with quality craftsmanship, industry leading customer service, and trailer with fit & finish that is second to none. At ATC we believe that your car hauler should be no less attractive and functional than the car you're hauling.

MADE IN THE USA

We believe that one, sole company should be responsible for their product. In today's world of outsourcing everything from material production, assembly, installation and even customer service, we build virtually every aspect of our trailers. From selection and procurement of raw materials to frame assembly; from interior and exterior cladding to plumbing and electrical system installation; from door fabrication and installation to custom cabinetry and millwork; every component is either produced or assembled under one roof in our Indiana facility.

ALUMINUM & STEEL

Our high-end standard and custom car haulers can be built in either aluminum or steel, your choice. We are one of the few trailer manufacturers who can make that claim. We will work with you to identify which construction material best suits your needs.

DEXTER AXLE

Our Open, Raven Car Hauler, Raven Plus and Quest Car Hauler models come standard with Dexter Torflex Axles, the leader in the trailer industry in axle quality and durability.

PLACE YOUR RAMPS ANYWHERE, TIE DOWN ANYWHERE

optional third ramp pictured

The ATC Open Car Hauler was designed to haul your car, but it can be used for more than that. With the perimeter rail, you can move the ramps anywhere on the side and rear of the trailer, allowing you to side load toys like motorcycles and ATV's. Use the same side rail to strap your toys down, and you're good to go for a weekend trip. And three-wheeler owners can also purchase an additional third ramp. All three ramps can be stored in an easy to use compartment underneath the trailer.

OPEN CAR HAULER OPTIONS

AIR DAM/GRAVEL GUARD

The sleek looking ATC Air Dam/Gravel Guard protects your car from loose debris on the highway. The slight curvature makes it aerodynamic, the slim profile maximizes the deck space for your car and other cargo, and the mill finish gives it a clean look.

DETACHABLE WINCH PLATFORM

The ATC Open Car Hauler Detachable Winch Mount keeps your winch off the deck, maximizing space for your car and other cargo. The mount can easily be removed by pulling a pin, allowing you to store the winch away from snow, rain and theft. It's made of durable steel with a protective powder coat, and is rated for a 5000 lb capacity winch. You can also purchase a winch package that includes synthetic rope winch rated at 4000#.

TIRE RACK

The ATC Open Car Hauler Tire Rack is durable enough to handle the continual work load of an avid racer. The 2" x 2" tubal aluminum frame securely holds a full rack of race tires for a cross country trip to your favorite track. Wedge a partial load of tires to the side with the tire rack clamp, included with purchase of the rack.

SPARE TIRE

A spare tire for your trailer can be mounted on the tongue. If the space on the tongue is taken up by the tool box or winch, we can mount the spare tire underneath the deck of the trailer.
