

Roadtrek™

The Motorhome that...
Drives like an SUV!™

The Motorhome

The counter top is molded fiberglass with solid surfaces (so moderate scratches can be repaired). It offers ample clearance above, an under mounted sink with single lever faucet and flush cover/cutting board, and a recessed stove with flush cover. Beautifully crafted maple cabinetry with solid maple doors creates a brighter and more modern looking interior.

For more storage on vacations, remove the seat behind the driver and install our removable wardrobe. Just as easily, remove the wardrobe, return the lounge seat, and you have front seating for four again.

You've got it ALL!

It's all yours with Roadtrek: the comforts of a larger motorhome with the parking ease, drivability and styling of a full-size SUV or luxury van. Whether you're heading cross-country or cross-town, why not have all the comforts of home: your own bathroom, change room, kitchen, living room and bedroom. Add to that the performance, fuel economy, parking ease and towing capacity of a van, and you'll see why Roadtrek is the #1 selling class B motorhome (*camper van*) in North America - since 1990!

Comfort First - Always!

Getting there should be half the fun! With power lumbar supports in the front captain's seats, ample legroom, a large panoramic windshield and oversized windows, you've got a vehicle that provides a superior driving experience. After a day on the road, you and your companions can bed down in home-style comfort. Roadtreks sleep up to four - with one or two single beds up front, and up to a king-size bed in the rear. There are no uncomfortable electric sofa/beds in the rear - instead you'll enjoy sweet dreams on high-grade dual-density foam cushions - with no bumps, sags or gaps.

Go Ahead - Stretch Out!

After your day's travel, swivel the captain's seats around to open up a spacious seating area. Even if it's just the two of you, four seats at the front (*on some models*) provide more openness and space to eat, entertain or relax with another couple. A third seat (*on all models*) and one of the captain's seats provide an eating area for two at the front that's much easier to use than just two captain's seats. Being able to dine at the front allows you to leave the rear made up for sleeping full time. You can wake up and retire at different times and you don't have to set up a lounge or dinette to eat every morning, or make up a bed every night. Now that's real "utility"! (*If you prefer more storage, the passenger seat(s) can be replaced with an armoire and/or a removable wardrobe.*)

Hold Your Head High!

By lowering the floor, there's plenty of headroom without requiring an exceedingly high roof (*a lower roof provides better fuel economy, handling, overall height and appearance*). It also allows for easier entry and exit and a more comfortable counter height. The aisle is 30" wide, so 2 people can pass with ease.

Privacy When You Need It!

Privacy is yours when you want it - and when you don't, it doesn't take up valuable space! Instead of squeezing you into a cramped permanent bathroom with a sit-down shower, Roadtrek lets you create a spacious temporary bathroom with a stand-up shower or change room in a matter of seconds using bi-fold privacy doors. The hygienic sink liner allows you to perform personal hygiene with the

By swiveling both captains' seats, the cab is also a living area for eating, entertaining or just relaxing. Our cloverleaf table with extendable leaves combines the large surface area of a kitchen table with compact convenience of a smaller table.

galley sink, saving valuable space and leaving the galley sink clean for food preparation. When not needed, the toilet and shower are concealed behind the privacy doors - leaving you more room. These same doors can also be used to create separate sleeping quarters at night. Since it is centrally located, the bathroom is accessible from either sleeping compartment (*front or rear*). Now that's private and convenient!

Pack Up & Pack It In!

There's no shortage of storage in a Roadtrek - up to 114 cubic feet in one model! - so you never have to leave those important extras behind. This is achieved in part by placing most of the water tanks below the floor and not using electric sofa/beds whose framing and mechanisms result in limited space for storage and equipment below. There's also cavernous exterior storage compartments creating more interior living space. And with Roadtrek's lightweight, you get industry-leading cargo carrying capacity.

Instead of a conventional roof top air conditioner, 170 and 190 models are equipped with a 'Dometic' heat pump (*air conditioner and heater*) built into the roof allowing you to park in many RV restricted areas. Ducts ensure comfort all around. And it's mounted outside for easy service access and external water drainage.

Our three section floor plan provides many advantages over other designs: forward facing seating for up to 6; private sleeping sections; aisle maintained when beds are set up; all beds at floor level; easy access to central bathroom/privacy area; 30" wide aisle where 2 can pass with ease; separate eating/sleeping sections for 2; possible permanent sleeping area at rear; and choice of front or rear seating areas.

Every Roadtrek offers a large, lighted exterior storage compartment. For added convenience, there's even an exterior shower. The 200 models have an additional 12 cu. ft. of storage in the rear quarters (*accessible from both sides*) making an ideal area for long objects like skis or fishing poles.

You can never have too much storage space, so Roadtrek's "across the rear" storage area provides room for 2 sets of golf clubs or whatever you wish to bring along.

The Van

On 170 and 190 models, 40/60 split side doors provide easy entry using one door that features a low entrance floor and higher standing height.

Vehicle on cover shown with optional ground effects that improve handling and appearance. Above are standard running boards without ground effects. Large windows all around increase visibility.

Get a Handle on This!

Roadtreks are nimble, responsive and a real pleasure to drive whether it's cruising down the highway, roaming back roads, maneuvering through congested traffic, or sliding into a campsite or parking space.

Enjoy outstanding handling for more pleasurable driving and greater safety. In addition to the excellent suspension, steering and braking capabilities of the Chevrolet chassis, Roadtreks have the laws of physics on their side. They have a much lower center of gravity than their taller cousins. Water tanks are located close to the axles for better weight distribution. With a much longer wheelbase (*compared to the overall length*) a Roadtrek provides unsurpassed highway stability. (*A Roadtrek 190's length is only 58% longer than its wheelbase compared to 91% for a 22' B+ motorhome with a 138" wheelbase.*) Body-on-frame construction, a short rear overhang, "normal" and "towing" transmission modes, and an optional higher rear axle ratio provide unrivalled towing performance.

With Roadtrek's small size, parking is a breeze. Slide into a regular sized spot near your destination instead of searching for multiple spaces on the outskirts of the lot - or the outskirts of town. Enjoy intimate campsites in the mountains where larger motorhomes fear to tread - and aren't allowed. There's even a rear window defroster to keep your rear view clear. Most motorhomes don't even have a rear window to keep clear! Since Roadtreks don't look like motorhomes, you can often avoid RV parking restrictions.

A Roadtrek is more than just a family camper. With up to 6 forward facing seats with seatbelts, it makes a great second vehicle. The cost of owning and operating a Roadtrek is far lower than a second vehicle in the driveway AND a motorhome in storage! Consider their higher resale value (*compared to other motorhomes*) and the depreciation rate of a car, and you've got an unrivalled value.

More GO for your DOUGH!

Roadtreks offer exceptional fuel economy thanks to their aerodynamic shape and lower overall size and weight. They really show up their bulkier Class A, C and B+ cousins, as well as higher roof Class B's.

The lowered floor allows a low, sweeping roof. You won't find a roof-mounted air conditioner blocking the wind and cooling down your gas mileage - that's because the air conditioner is built into the rear, with only the flush-mounted grills visible from the rear.

Unique... Innovative... Exceptional!

Roadtreks are a testament to original thinking - nothing is left to chance - and there are 15 Canadian and American patents to prove it!

The refrigerator vent is disguised and integrated into a black louvered grill in the galley window. The fresh water fill is securely located inside a passenger side or rear door to prevent tampering. Large frameless awning windows provide superior ventilation, remain functional in the rain, reduce wind noise, look better, and provide superior views.

We didn't stop there: there's the 'Dura-Drain' sewage hose system; cloverleaf dining table; temporary bathroom/privacy area; stand-up aisle shower; lowered floor; built-in air conditioner; running boards with integrated storage; under-floor tanks; dual layer foam beds... and we're constantly innovating more!

It's ALL For YOU!

The look will grab you, the comfort will seduce you, just one drive will convince you - how enjoyable, effortless and economical the Roadtrek experience truly is!

Roadtrek is one of the most aerodynamically efficient camper vans there is. Sleek lines, low profile and light weight optimize fuel efficiency and handling.

On 170 and 190 models, wide swing dual rear doors allow for easy rear loading or egress.

[We] sold our home... Six months and [25,000 miles] later we returned [home]. The Roadtrek was phenomenal. Its layout and features allowed us great flexibility in our travels... The Roadtrek went everywhere and anywhere, with ease. It was comfortable, easy to drive, great mileage, great sleeping comfort and was spacious enough that even our 80 pound Lab was no trouble. In 6 months we spent all of 5 days in a motel!! ...we were completely inexperienced, but with the Roadtrek's extensive and user-friendly systems, RVing was a treat right from day one. Lest I forget, talk about holding its value: we sold our Roadtrek two years after we bought it for within \$1200 of what we paid for it!! What more can I say. The Roadtrek is one beautiful machine.

**Lynda & David MacMahon,
North York, Ontario**

This is my fourth motor home RV and it is the only one that has been trouble free. Not a single problem---and good gas mileage to boot.

James Wylly, Savannah, Georgia

The 190-Versatile

The Open Road Calls!

The perfect companion for daily errands, vacations or weekend adventures - the 190-Versatile! Whether it's the whole family or just the two of you, enjoy the world in comfort and style!

Check this out! Two captain's seats and 2 forward facing lounge seats make up comfortable seating for 4 as you navigate your way down winding trails. At night, tuck into 3 comfortable beds that provide sleeping for up to 4. The rear dinette or L-shaped lounge turns into a large double bed. The privacy doors let you watch some TV or curl up with a book without disturbing the sleepers up front.

With the 190-Versatile, the secret is in its name. It is truly "Versatile"! Whether "roughing it" at a campground or soaking up the rays at the beach, travelling takes on new meaning when you have all the comforts and conveniences of home combined with an economical and easy to drive van.

When you're not off blazing new trails, the 190-Versatile is the perfect second family vehicle. Remember - convenient forward facing seating for up to 6. How better to take on the challenges of everyday living? The 190-Versatile, your answer to the call of the road!

Happy Anniversary!

To celebrate our 30th anniversary, 170 and 190 models are available with a Special Edition package. Pictured at right, the stylish exterior includes custom ordered Cadillac "Sterling Silver" GM factory paint, exclusive polished chrome wheels, ground effects, unique striping and commemorative decals, black-out painted sections between windows, and silver awning. Locking differential and 4.10 rear axle ratio are also included on 190 models. Inside you'll find two-tone light grey leather seating with medium grey inserts and piping, silver accent dash and door panel trim, a commemorative decal, and a rear view mirror with compass and exterior temperature display.

The galley is equipped with 3.0 cu. ft. refrigerator, microwave oven, LP gas stove, exhaust fan, and sink. At the rear, choose a dinette, or L-shaped lounge with cabinet for audio/video equipment and/or storage.

Large double bed (up to 6'2" x 5'2") of 5" thick dual density foam provides firm, comfortable support. The optional premium brand flat screen TV allows you to watch TV in bed or swing it into the aisle to watch in comfort from the front captain's seats.

190-Versatile living arrangement (dINETTE)

190-Versatile living arrangement ("L" lounge)

190-Versatile sleeping arrangement

From its clever, compact and quality use of every inch of space to its sleek look, from the back roads of the Northwest to the busy streets of DC and the narrow lanes of New England, the Roadtrek accommodated our needs for comfort, charm, performance and economy. We love it!... RV shows led me to believe I needed more than 19 or 21 feet for fulltiming. We ended up with a larger motorhome for awhile... Then... we down sized to the 19 foot Roadtrek. It has served us well for over a year now. We are able to travel easily with no tow vehicle. Our mileage is better, our insurance lower, and best of all, I can and do drive it. It takes us to beautiful places, to visit lots of wonderful family, and to the local supermarket...

Gael P. Mustapha, Green Valley, Arizona

I would like to let everyone know that my 190-Popular is the finest equipment that I have ever owned. Thanks again..

Jerry Archer

The 190-Popular

Travel a la carte, Uptown or Out-of-town

Do you want an ideal way to leave the rest of the world behind - just the two of you - without sacrificing comfort or convenience? The 190-Popular sets the mood whether you're lazing down endless backcountry roads, or searching for that restaurant the locals have been raving about.

When it's cruising for two, you'll be cheerful and rested in the captain's seats up front. The 190-Popular really comes into its own when you watch dusk silhouette the road ahead, and you're seeking that perfect spot to spend the night. When it's time to turn in, the rear dinette converts to a sumptuous king-size bed (up to 6'4" long) or into 2 comfy twin beds (up to 6'4" long) with a night table between. If you prefer, instead of the night table, you can get two more forward facing seatbelts at the rear as an added option.

Round those features off with a full-length wardrobe, loads of storage, a cloverleaf dining table and a well-equipped galley - just pack up and you can hit the road for weeks! Now that's romance!

On June 6 2003, I purchased a Roadtrek 190-Popular... It is the best constructed vehicle I have ever camped in and your choice of the Chevy Express Van 3500 as a base vehicle is exceptional... After leaving the dealer's my wife and I camped for the next 2 nights in a nearby campground. Everything went well... A fine job to everyone at Home & Park!... My last camper van lasted 16 years and I am certain my Roadtrek will also!

Bruce H. Blaskopf, Blue Point, New York

The 190-Popular offers the flexibility of separate twin beds (up to 6'4" x 27")...

or an enormous king-size bed (up to 6'4" x 6'1"). The optional premium brand flat screen TV allows you to watch TV in bed or swing it into the aisle to watch in comfort from the front captain's seats.

Just thought I'd drop you a line to say that we traded our 190 on the new 200. We were most positive about our 190 but are ecstatic about our 200. Could heap a lot more praise on Home & Park for the excellent quality of materials and workmanship of your Roadtreks but it is getting late and I turn into a pumpkin if I don't get to bed on time!

Tom Williams

Having owned a variety of trailers, class B and A motorhomes, we can definitely say that the Roadtrek 200 has exceeded our expectations. There was really no choice but to go with the best. This decision was further enhanced by the sterling customer relations and product support provided by Home & Park Motorhomes. Exemplary, to say the least, and indeed "above and beyond" industry norm. It is easy to see why Roadtreks are #1 in North America.

CC Carruthers, Calgary, Alberta

The 200-Versatile & 200-Popular

Fall in love with travelling all over again!

Thanks to the Roadtrek widebody van, your hunt for the perfect RV is over! Whether you're taking in the symphony of fall colors or searching for that special antique shop, you'll have all the room you'll ever need!

The sleek one-piece fiberglass body is 7" wider than regular vans - but talk about style! It bares the automotive lines of the Chevrolet van. The body flows gradually wider from just behind the cab doors to the rear axle, then gently tapers to the rear. A one-piece body means no seams or joints to leak, and no fiberglass or plastic extensions to fill the gaps between original and widened body panels.

With its maximum width in the middle, the 200 sports a 30" wide aisle where two adults can pass with ease. Add an impressive standing height of 6'2" and you have a van with roominess untouched in its class! When it's time for culinary creations, you'll appreciate the expanded counter space, additional

work surfaces and a generous 4 cubic foot refrigerator (*raised for easier access in the 200-Versatile*).

Bed-time in the 200-Versatile means the exquisite comfort of a 6'6" permanent bed made with a quilted one-piece mattress - no more joints due to conversion from a dinette, lounge or electric sofa - and additional storage below. If you want more versatility, have an equal size bed that transforms into a spacious L-shaped lounge by day. 200-Popular owners will enjoy a dinette that converts to either 6'4" twin beds with a removable night table, or a 6'4" by 6'5" king-size bed.

Enjoy the drive! The 200 is the only widebody to use the superior Chevrolet chassis. Its spacious cab has lots of legroom for easier swiveling of the captain's seats and effortless movement to the rear. The panoramic windshield and windows make sure you don't miss any of Mother Nature's glory. Go ahead, indulge yourself and experience the Roadtrek lifestyle - you've earned it!

Use the 200-Popular's cab area as living space by swiveling the front captain's seats. Leave the rear bed made up all the time and you still have a great area up front where the table accommodates three. If you want more space for your friends, the rear dinette seats another two for dinner, or four for games.

The 200-Versatile's standard 6'6" permanent double bed allows a one-piece quilted mattress and provides abundant unobstructed storage below.

The 170-Popular

The Ultimate SUV (*Seriously Useful Vehicle*)!

Roadtrek's most compelling alternative to SUVs and conversion vans is here! The 170-Popular on the Chevrolet Express 2500 regular van is the easiest of all Roadtreks to maneuver through traffic and fit into those car sized parking spots. The 170 has many features you take for granted in a car, like better fuel economy than most camper vans (*never mind larger motorhomes*), along with the full-size motorhome features you would expect from any Roadtrek.

The 170-Popular seats 5 and sleeps 3 with ease. The rear L-shaped lounge converts easily to a 6'2" double bed that is both spacious and comfortable. With "across the rear" storage below the bed, you have all kinds of room for the things you want to bring along. The front cloverleaf dining table stores neatly out of the way, creating even more room to stretch out and relax.

Add an optional flat screen TV, DVD player or VCR and you have an entertainment system that takes up very little room while providing you with

something to do on a rainy day. The TV rotates into the aisle so you can watch it from the front captain's seats - the most comfortable seats in the house.

Whether you're on your way to the soccer game with the kids and need a change room, or heading out of town for a weekend getaway, you will appreciate the driveability, parking ease and efficiency of the 170. It's the perfect second vehicle that combines convenience, comfort and value all in one affordable package.

Being a lone traveling woman of 80 years of age, I wanted you to know what real pleasure this van has given me. I am the owner and sole driver of this vehicle and I now have over 88,000 miles on it. It is still my greatest pleasure and I plan many more miles to come.

Lorraine L Caffey

We decided to trade our Roadtrek for a larger motorhome to have more room; we kept it two months, took it back and bought another Roadtrek!! My wife can and does drive the Roadtrek where she wouldn't the larger motorhome.

Maurice & Muriel Baker

We covered a total of 7000 miles in 20 days and thoroughly enjoyed every mile... The Roadtrek performed admirably throughout the trip, and at no time did we wish we were traveling in any other type of RV. We are convinced that for 2 or 3 people the Roadtrek 170 is the perfect vehicle, combining all the best features of a large camping rig with the worry-free maneuverability of a van... Camping in the Roadtrek was so simple and convenient. No jacks to struggle with, and so easy to park and level. The primitive campsites were the simplest of all. Just pull in and the fully self-contained unit is all set. ...the bed was far better than we had dared hope for in a camping unit.

My wife and I highly recommend the Roadtrek 170 as a money saving combined camping rig/second car option to anyone interested in part-time excursions into the great outdoors... Thank you all for building such a fine and attractive motorhome as the Roadtrek 170. Keep up the good work and HAPPY TREKKING to all.

James & Julie Mager, Ishpeming, Michigan

Our rear L-shaped lounge provides a comfortable place to eat, watch TV, play games, or just relax with a good book. And it converts to a 6'2" double bed.

I suffered a stroke at the age of 55 and was devastated that my traveling days were over. Little did we know that a vehicle such as the Roadtrek would be available to us. It changed our life. We bought the 170 and just love it. It fits our needs to a tee. Just right for the two of us and our cat. We go... every summer for about 2 months and... for one month every winter. It is wonderful being alive and part of the camper's world.

Mr & Mrs Coffeys, Annapolis, Maryland

A Commitment to Safety

These 2 photos show the rear impact test on the 200 model. The test vehicle was impacted by a moving barrier at 30-mph (48 km/h). The entire fuel system was then inspected for leakage. Our test vehicle did not leak any fuel.

For frontal impact testing of the 190, the test vehicle impacted a fixed barrier at 30-mph (48 km/h). Again our test vehicle did not leak any fuel.

We are so serious about manufacturing the safest class B motorhome that we hire independent engineering firms to test our vehicles. The results follow.

TESTING RELATED TO FUEL SYSTEM MODIFICATION TO ACCOMMODATE LOWERED FLOOR

When GM completely redesigned the Chevrolet van in 1996, they relocated the fuel tank on all van (*and some van cab and chassis*) models from behind the rear axle to between the axles (*mid-ship*). To enjoy the benefits of a lowered floor on 170 and 190 models (*improved fuel economy, handling, appearance, overall height, galley counter height and ease of entry and exit*), we simply lowered the original tank by 1.5". The tank's clearance is still higher than the running board and sewer discharge, which have proved sufficient for years. You won't enjoy the "off road" clearance of a truck, but you'll be fine if you don't drive anywhere you wouldn't drive a car.

On 200 models, the original mid-ship fuel tank was removed and replaced by a custom tank located behind the rear axles - as located on van cab and chassis with higher GVWRs and much larger tanks. The exhaust system was also modified.

To modify the fuel systems, GM requires that we meet or exceed very stringent safety and engineering standards. This mandatory testing includes:

Fuel System Integrity Crash Testing (Federal Motor Vehicle Safety Standard 301)

The purpose of this series of tests is to reduce deaths and injuries occurring

from fires resulting from fuel spillage during and after crashes. The testing consists of 3 impacts: frontal, side and rear. For the frontal impact, the test vehicle impacts a fixed barrier at 30 mph (48 km/h). For the rear and side impacts, the test vehicle is stationary and impacted by a moving barrier at 30 mph (48 km/h) and 20 mph (32 km/h) respectively, which simulates the effect of being struck by other vehicles. After each impact, the test vehicle is rotated 360 degrees upon its axis and held stationary for 5 minutes, every 90 degrees. The test vehicle can leak no more than one ounce (28 g) of fuel per minute to pass. Our test vehicles did not leak any fuel.

Exhaust Emission Testing (California Air Resources Board)

Today's vehicles require increasingly stringent pollution control equipment. Exhaust emission testing was successfully conducted on the Roadtrek 200 to ensure that it did not exceed limitations.

Fuel System Evaporative Emission Testing (CARB)

In addition to controlling exhaust emissions, evaporation of fuel is a source of pollution that must be strictly limited. The entire fuel system (*fill, tank, lines, etc.*) cannot leak more than the equivalent of a pinhole. Testing verified that Roadtreks met this requirement.

Second Generation On Board Diagnostics (OBDII) Verification (CARB, Vehicle Code: Sec. 27156)

Today's vehicles are equipped with sensors and actuators that sense the

operation of various components and actuate others to maintain optimal performance. On board computers are capable of monitoring all of the sensors and actuators to determine whether they are working as intended. Included are those that detect fuel evaporation, as described above. It was verified that the OBDII system is functioning properly on all Roadtreks.

OTHER MANDATORY TESTS

Occupant Head Protection Testing (FMVSS 201U)

The purpose of this complex series of tests is to provide occupants with additional head protection to interior pillars, side rails, headers and roofs during crashes. This testing confirms adequate impact absorbing design and special materials are used in the subject areas to reduce head injuries. Successful testing involves launching a test "head" at numerous target points in the vehicle's interior without exceeding limited thresholds of "injury" to the "head". Targeting, launching and recording of the impact forces are controlled by a computerized system. All affected Roadtreks have passed these very stringent tests. Some other RV manufacturers cannot make this claim.

Seat Belt Testing (FMVSS 210)

The purpose of this testing is to reduce deaths and injuries to motor vehicle occupants during crashes. It confirms proper seat belt location for effective occupant restraint, and minimizes the

possibility of seat belt anchorage failures. Successful testing requires the application of a 3000-pound force in a forward direction to the seat belts for 10 seconds without failure. Testing confirmed that all Roadtrek seat belts meet these requirements.

Seating System Testing (FMVSS 207)

The purpose of this series of tests is to reduce deaths and injuries to motor vehicle occupants during crashes. This testing minimizes the possibility of failure of the seats and their attachments as well as installation problems. Successful testing requires the application of significant forces in various directions to the seats and their attachments without failure. All Roadtrek seating has been tested to ensure it meets or exceeds these requirements.

Flammability Testing (FMVSS 302)

The purpose of this testing is to reduce deaths and injuries to motor vehicle occupants caused by fires, especially those originating from the vehicle's interior from sources such as matches or cigarettes. Testing confirms that the burn rate of affected interior materials does not exceed specified maximums. All applicable materials used in Roadtrek interiors meet or exceed the specified burn resistance requirements.

VOLUNTARY TESTING

There are numerous safety standards that apply to lighter vehicles, such as passenger cars, but not to heavier vehicles, such as class B motorhomes.

Occupant head protection testing is intended to ensure occupants have additional head protection from interior components during crashes.

These 2 photos depict simultaneous seat belt pull testing and seating system testing. Seat belt testing confirms proper seat belt location and minimizes the possibility of anchorage failures. Seating system testing verifies the integrity of the seats, their attachments, mounting hardware and installation.

A Commitment to Safety

Seating system testing minimizes the possibility of failure of the seats, their attachments and their installation.

Dynamic rollover testing is intended to reduce deaths and injuries from occupants and their appendages not remaining within the passenger compartment during rollover accidents.

Roof crush resistance testing is intended to reduce deaths and injuries from roof crushing during rollover accidents.

They do not apply for various reasons, such as the inherent safety advantage of heavier vehicles, or that it does not make sense on such vehicles. In order to “raise the bar” on the safety of Roadtreks, we have voluntarily conducted numerous tests that are not required by law, nor done by most of our competitors.

Dynamic Rollover Testing *(part of FMVSS 208)*

The purpose of this testing is to reduce deaths and injuries from occupants and their appendages not remaining inside the passenger compartment during rollover accidents. The test is conducted by placing the test vehicle on a movable platform perpendicular to the platform’s line of travel. To help start the rollover, the test vehicle rests at a 23 degree lateral incline with the tires against a “trip” flange. The platform is propelled down a test track to 30 mph (48 km/h) and stopped in such a way that the vehicle is propelled from the platform.

Although the platform speed and height of the trip flange were increased above the requirement, the Roadtrek would not rollover. This is considered a pass (*in a rollover situation, what safer vehicle to be in than one that does not rollover?*).

Roof Crush Resistance Testing *(FMVSS 216)*

This testing is intended to reduce deaths and injuries due to crushing

of the roof into the passenger compartment during rollover accidents. The corner of the roof at the top of the “A” pillar (*between the windshield and front door windows*) cannot crush more than 5" (125 mm) when applying a force equal to 1.5 times the vehicle’s unloaded vehicle weight. This testing was conducted at the top of the “A” pillar and also at the top of the outer roof window. The Roadtrek successfully passed both of these tests.

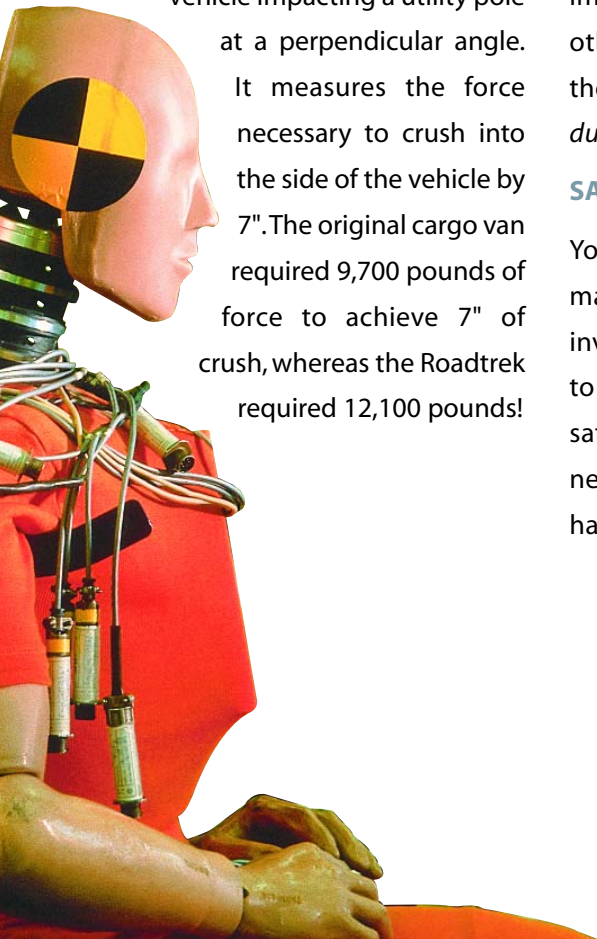

Comparative Side Crush Resistance Testing *(part of FMVSS 214)*

During the manufacture of conversion vans (*4 captain seats, rear sofa/bed, and*

with or without a raised roof; not to be confused with class B motorhomes), some of the original vertical reinforcements or "studs" are removed from the original "cargo" van body to allow the installation of side windows. Although this meets with applicable safety standards, we wanted to compare the strength of the original cargo van with no studs removed, to Roadtreks which have some studs replaced with cabinetry secured to the chassis (although wood is not as strong as steel under equal conditions, the original steel studs are of minimal thickness and depth, whereas our cabinetry is much more substantial).

This testing is intended to simulate the vehicle impacting a utility pole at a perpendicular angle. It measures the force necessary to crush into the side of the vehicle by 7". The original cargo van required 9,700 pounds of force to achieve 7" of crush, whereas the Roadtrek required 12,100 pounds!

"Automotive Manufacturer Style" Durability Testing

Durability is more an issue of customer satisfaction and value, but improved reliability can result in increased safety (less breakdowns, etc.).

Automotive manufacturers conduct extensive durability testing where they put the equivalent of 80,000 to 120,000 miles (130,000 to 190,000 km.) of wear on a vehicle in a short period of time as part of the design and development process. By having durability testing conducted for us, numerous design improvements - which would only have become apparent during the normal life of the first Roadtreks built and sold - were quickly identified and implemented. We are not aware of any other RV manufacturers that conduct the same tests on its products (probably due to the costs involved).

SAFETY FIRST - always!

Your safety is our priority! No other manufacturer of class B motorhomes invests so much time, effort and money to ensure the product we offer you is as safe as can be. When shopping for your next motorhome, select the one that has been proven safe... the Roadtrek.

These photos depict side crush resistance testing which is intended to simulate the vehicle impacting a utility pole at a perpendicular angle.

"Automotive manufacturer" style durability testing allowed us to quickly identify and implement numerous design improvements which would otherwise only become apparent during the normal life of the first vehicles built and sold.

Our Commitment To You

East coast interlude

I have always owned one type of RV or another over the past 30 years, from class A to class C. I consider the Roadtrek the best engineered, developed and constructed RV for its size of any I have ever owned or seen on the market.

Gary & Jane Alden, Destin, Florida

I had an accident with my Roadtrek. The reason I'm telling you about my unfortunate mishap is to applaud the [crash test] report in the last pages of the Roadtrek sales brochure... I'm very happy you made my Roadtrek as strong as you did. It not only drives like a van, it "Protects Like a Tank"!! Why would anyone buy any other Class B Motorhome?

Reed E Cox, Pace, Florida

My goal is to offer you an UNRIVALLED combination of product design, quality, price, and customer service. Period.

**Jeff Hanemaayer, Chairman,
Home & Park Motorhomes**

Established in 1974

The Roadtrek is the result of one man's determination to get exactly what he wanted in an RV.

Having no interest in being a "weekend bus driver", Mr. Jac Hanemaayer of Kitchener, Ontario, knew a large Class A or C motorhome was not for him. Yet he was not about to trade the comfort and amenities they offered for the convenience and mobility of a van. Unable to find the best of both worlds in the marketplace, he did what came naturally to him. In 1974, he designed a vehicle for himself and had it built by a fledgling local camper van manufacturer, Home & Park Vehicles Ltd.

He was so pleased with the result that he bought the company.

Being a true innovator, Mr. Hanemaayer was never content. In 1980, he completely redesigned the vehicle, incorporating his now famous sweeping roofline, lowered floor and three-section floor plan. The Roadtrek Motorhome Van was born.

With a commitment to continually refining its vehicles so they are one step ahead of the competition, Roadtrek has grown to become the best selling North American camper van (since 1990).

"Quality Trek" Story

Along with its truly innovative design, an unwavering commitment to quality and continuous improvement is the key to Roadtrek's success over the years. In fact, Home & Park was the first RV manufacturer in North America to obtain registration to the rigorous international standard ISO9001:2000(E). ISO (*the International Organization for Standardization*) is a worldwide federation of national standards bodies. The ISO 9001:2000(E) standard is a complete Quality Management System Standard with an emphasis on effective processes and continuous improvement.

In addition, every Roadtrek meets and often exceeds rigid RVIA, CSA, UL, FMVSS, CMVSS and General Motors standards set for recreational vehicles. Each Roadtrek is also subjected to over 200 quality checks, inspections and tests. On top of all this, employees are responsible for the quality of their own work. Every vehicle is individually built with painstaking care and attention to the smallest detail.

Backed with Pride

It is fitting that the 'best built' should be the 'best backed'. To reflect the confidence we have in our vehicles, Home & Park offers a 3 year or 36,000-mile/60,000 km Limited Motorhome Warranty.

Loyalty Speaks Volumes

What better vote of confidence can a camper van receive, than one given by the people who use it? In a comprehensive study of nearly 2,000 Roadtrek owners, 85% of those

We try to keep a large selection of finished units on hand so, if your dealer doesn't have what you want, you don't have to wait long to take to the highway in your new Roadtrek.

looking to buy another RV planned to buy another Roadtrek. Some of them for a second, third and even fourth time!

A Father's Dream... A Son's Reality

Despite growth in sales and expansion of markets, Home & Park is still run by people who are passionate about their products and the people who buy them. Our staff has access to company demonstrators to use for their own vacations. This is an excellent way to get feedback for product improvements.

Founder Jac Hanemaayer still participates in the development of the vehicle he originated. His son Jeff started as a summer student employee and knows the product and industry inside out. In his previous position as President, Jeff oversaw the company's growth from 1985 to 2000. He continues to guide Home & Park as Chair while Roadtrek's popularity soars to new heights.

To both Jac and Jeff, research and development still mean taking your product out and putting it through its paces. They both use their own Roadtreks avidly. They know that living with a Roadtrek helps to stimulate creativity in figuring out those special changes that make a good thing even better!

More than just a Sale

Jeff is committed to more than just selling and refining the excellent vehicles that are Roadtreks. The after-sales service, both from the factory and dealer network, is dedicated to make owning a Roadtrek a long-term positive experience.

Taking this Show on the Road

Jeff knows that customer service is more than just a 1-800 number. He believes in meeting face-to-face with the people who put their faith and hard-earned money into a Roadtrek. It's not uncommon to see Jeff at RV shows and Family Motor Coach Association (FMCA) rallies, personally leading discussions and answering questions. It's his commitment to Roadtrek - and to you!

A lot of Happy Campers

Buying a Roadtrek means even more than becoming part of the 'Roadtrek-ker' family - it means a chance to join a North America-wide owner's club - Roadtrek International. With the ongoing support and assistance of Home & Park, the club became an active chapter (*and the only camper van chapter*) of the FMCA in February of 1993. By 2003, the membership of Roadtrek International exceeded 1900 vehicles (*over 3500 people*). One of the advantages of membership is meeting new friends with common interests. Members take part in group outings, tours, and suppers where they exchange Roadtrek adventures and share ideas.

Still driving ahead

Roadtrek is the best-selling camper van in North America but Jeff doesn't intend to stop here. He has a winning formula designed to take the RV industry by storm: exceptional employees, an innovative, high quality product, a state-of-the-art production facility, a superior dealer network, and his commitment to the 'Roadtrek-ker' family.

Following these principles, the 'Motorhome that Drives Like an SUV' is destined to - one day soon - become the best selling camper van in the world!

A Father's Dream... A Son's Reality
Jac and Jeff Hanemaayer

Owning a Roadtrek is a lifestyle. It is the freedom to "ride away" to a Rally or into the Canadian or American wilderness. It's about people and making friends. It's about nature, our cities and our beautiful landscapes. It's about the sculptured desert of Arizona, the fishing villages of Maine and Prince Edward Island, the rolling hills of Kentucky, the vast Canadian prairies, the Cape Breton highlands of Nova Scotia and the majestic Canadian Rockies. That's what our Roadtrek means to us.

Paul and Huguette Blissett, Orleans, Ontario

Roadtrek International 10th Anniversary Rally

Member #C003790

The Many Features of Roadtrek

Any Roadtrek can be equipped with our optional full-height armoire. It permanently replaces the passenger side lounge seat and offers 13 cubic feet of extra hanging or shelf space on numerous adjustable and removable shelves and drawers.

Every Roadtrek is equipped with our hygienic sink liner. Rather than wasting limited space on a separate bathroom sink, just insert the hygienic liner into the galley sink to perform personal hygiene. When finished, remove the liner, leaving your galley sink clean and untouched for food preparation.

Rather than using a sit-down shower or messy wet bath, you can use the stand-up shower in the aisle. What other camper van can give you that kind of convenience?

On 170 and 190 models, the heat pump (*air conditioner & heater*) with ducts to the front and rear bed areas is mounted outside for easy service access and external water drainage.

You can watch TV from the rear lounge or bed with our optional premium brand 15" flat screen TV. Providing superior picture quality and using less space than a conventional TV, it rotates to allow viewing from the front captain's seats - the most comfortable places to sit. An optional DVD player and/or VCR reside in the adjacent audio/video or storage cabinet.

Optional Continental kit looks great and provides more interior storage. It's mounted off centre to the trailer hitch to allow towing and access to one door. To access the other door, simply remove the hinge pin to lower the spare tire. To access the tire, just unclasp the tire cover.

Extendible dining table is ideal for two people to use from the driver side captain seat and lounge seat, but can also accommodate one when the driver seat is facing forward and four when the table's extended. It also allows easier passage from the front to the back of the van - a perfect fit with the armoire option (*which replaces the passenger side lounge seat*).

Turn the awning on your Roadtrek into a private room for you to enjoy the outdoors -- bug free! The optional Florida Room is made with lightweight, durable, water and mildew resistant fabric. It is quality crafted with the best zippers, straps, latches, and screening. This lightweight screen room folds up into a small carrying bag. The poles fold in half and store separately.

Easily accessible, our patented "Dura-Drain" sewage hose system provides a permanently attached sewage hose that eliminates messy handling and storage. The wastewater tank releases and the fresh water tank drain are adjacent.

On 170 and 190 models, a large capacity auxiliary lead acid battery is totally concealed yet easily accessible on slide-out tray.

To increase versatility, we've added a second fresh water tank inside 190 models. By using anti-freeze in the black and grey water tanks, the water system can be used in moderate sub-freezing conditions.

Frameless awning windows are better looking, reduce wind noise, improve aerodynamics, and provide superior air circulation even during foul weather. Their larger size provides a better view from inside. The Integrated Venting System provides inconspicuous ventilation of the refrigerator.

On 170 and 190 models, a removable cover reveals a drained trough that spans the lowered floor and prevents water from leaving the shower area.

External LP gas barbecue connection with quick disconnect.

A 110V air/conditioner built into the upper rear cabinets cools the interior while maintaining Roadtrek's aerodynamic shape and sleek roofline.

On 170 and 190 models, there is a separate compartment for an exterior shower and city water connection with quick disconnect.

Questions and Answers

Where do you want to go?

In 1959 my wife and I bought an 18' Airstream trailer, two years later I retired... Through the next 30 years we owned 4 more Airstreams and towed them a total 239,232 miles and spent 2997 days away from our home RVing... In 1989, we sold our last trailer and bought a 27' motorhome and soon found ourselves towing a Toyota. Soon I realized that was no way to travel... Too, all the highways are under repair... We considered travel in our 27' dual-wheeled motorhome excessively hazardous.

Why choose the small Roadtrek - considerations like safety, ease of handling, parking and fuel costs, servicing costs, parts availability, garaging, neighborhood tolerance, storing, squeezing through tight places, height bulk & weight considerations... Our 37 years of RVing and our ages has cut our trips shorter and allowed Roadtrek to perfectly fill the bill for us.

Milton Johnson, Roff, Oklahoma

I am happy to report what I feel is fantastic fuel mileage on my new 200-Versatile on Chevrolet chassis; I can average 15.2 mpg. I wanted a unit that did not look like a motorhome, and my Roadtrek doesn't, it looks like a van! Now I can easily get under a 9' garage door... lets me park in less space. My Roadtrek is much "prettier" and much sleeker-looking, and has a vast amount of storage space with its basement...

Anonymous survey respondent

In case you were wondering before you go wandering...

Whether it's your first Roadtrek or your fourth, there are often questions that arise. While we are always eager to hear from you, we thought it might be helpful to summarize the top questions we have received over the years and give you the answers here:

Q: Can I buy directly from the factory?

A: No. We sell through a dealer network to ensure excellent sales and service of our product. In fact, because many states and provinces legally require the retailing dealer perform certain checks, you cannot even take delivery at the factory. Arrangements can be made through your local dealer, however, to take delivery at our local Kitchener dealer (*Canadian residents only*), or one in New York state or Michigan (*U.S. residents only*).

Q: Can a U.S. resident buy in Canada?

A: A U.S. resident needs a Roadtrek built to U.S. specifications. Canadian units are not built to U.S. specifications.

Q: Why do Roadtreks cost more than some B+ and class C motorhomes and low end class A's? Why don't they cost less, considering their smaller size?

A: Roadtreks are more expensive to build due to the higher costs of manufacturing the "exterior shell"; building on the inside; adapting to unusual shapes; and working with limited space.

Q: Why is it more expensive to manufacture the 'exterior shell' of a Roadtrek?

A: Many B+ and class C motorhomes consist of a van cab and chassis to which a flat floor, straight fiberglass walls

and flat roof are added. The Roadtrek 200 has an aerodynamic one-piece molded fiberglass body added. A Roadtrek 170 or 190 starts with a complete van body from which the roof is removed and replaced with a higher molded fiberglass roof. Also a section of the floor is removed and replaced with a custom lowered floor. Other additional modifications are also required, but these are the most time consuming.

Q: Why is it more expensive to build from the inside of a Roadtrek?

A: With most class A's and C's, the interior is installed first from the outside with the walls and roof added after. This is less costly than Roadtreks that must be built within the confines of the exterior.

Q: How do 'unusual shapes' and working within limited space increase the cost of a Roadtrek?

A: It is much easier to adapt interior cabinets and components to the square fiberglass "box" of a class A or C than to the unusual curved shape of the Roadtrek's interior. In addition, it is more difficult to get all the equipment to fit comfortably within the limited space of a Roadtrek - and, when off-the-shelf items are not suitable, it's often more expensive to get custom made or modified components such as water tanks and LP gas tanks.

Q: Is a higher roof class B less expensive to build than a low profile Roadtrek with a lowered floor?

A: Yes, a higher roof class B is less expensive to build because no modifications are required to modify the fuel system to lower the floor, and there is more space available to install the desired equipment and components.

Q: There's only the two of us. Why would we want 3 or 4 seats at the front?

A: Four seats provide a roomy area to eat, entertain or relax with another couple. More importantly, a 3rd seat and one of the captain's seats provide an eating area at the front for the two of you that's much easier to use than the two captain's seats. Having separate eating and sleeping sections is a convenience normally found only in larger motorhomes. Not only can the two of you get up and retire at different times, but you need not convert the bed at the rear into a lounge or dinette to eat. Extra seating also increases openness at the front.

Q: What can I do if I still don't want the seat(s) behind the captain's seats?

A: The passenger side lounge seat in all models can be permanently replaced with our full-height armoire option. For models with 4 seats, our removable wardrobe is interchangeable with the driver side lounge seat. It provides more hanging space when needed while allowing extra seating when needed. For models with 4 seats, you can order both the wardrobe and armoire options

Q: Why don't you offer an electric sofa/bed in the rear?

A: Electric sofa/bed springs and framing designed for seating do not provide for a very comfortable bed. Besides, with a separate eating area at the front, most Roadtrek owners leave the rear made up as a bed all the time. Also, the framing and mechanisms of electric sofa/beds have limited space for storage and equipment below.

Q: Why don't you build your lounge seats on steel frames instead of wooden boxes?

A: Steel framed seats that convert to beds have limited space for storage and equipment. The seat belts of our lounge seats are mounted on the chassis. The wooden

seat bases have been tested and pass all mandatory safety tests (consider how many people have survived collapsed buildings by hiding under a wooden desk - don't underestimate the strength of a wooden "box"!).

Q: What is a heat pump?

A: In addition to being a 12,000 BTU air conditioner, it is a heating system that provides adequate heat at temperatures above 40 degrees F (5 degrees C) through a reverse internal cycle.

Q: Why don't you build on Ford chassis?

A: The Chevrolet Express van's design is better suited to our product than the Ford Econoline. Also, GM's full-size vans have received the highest ratings for quality and customer satisfaction of any of the domestic manufacturers.

Q: Are diesel engines available?

A: No. We regularly conduct surveys and receive feedback on this issue and there is very low demand. The low demand does not justify the additional manufacturing complexities and costs.

Q: Is the water system designed for winter use?

A: In 190 models, we've added a second fresh water tank. By using RV anti-freeze in the black and grey water tanks, the water system can be used in below freezing conditions to 10 degrees F (-10 degrees C). In 170 and 200 models, the fresh water tank and lines and water heater should not be used in below freezing temperatures. However, you can still use the sink and toilet by carrying a fresh water supply inside the vehicle and using RV anti-freeze in the black and grey wastewater tanks.

Being a Rock 'n Roll musician, Roadtrek has been my very best friend. It has all the conveniences of a luxury motorhome, except anyone who has a driver's license can drive it, park it and get it serviced just like an ordinary van. Roadtrek is the only answer I have found and, over the years, I've tried just about all of them!

Rockin' Ronnie Hawkins, Rock 'n Roll Legend

Styling... looks much better than competition. Storage... takes everything we had in 28' trailer. Reputation... friends have one. Our first trip... no packing! - everything there... just drive. Took last space in camp - we fit!... others turned away. Constantly get stopped by strangers asking to look inside my Roadtrek - happily comply.

A Scott, Scotts Valley, California

I would like to tell you how very happy I am with all the folks at H&P that I have dealt with. In over 30 years of RVing, and four motorhomes, I was never so well treated. Thank you for the caliber people you have.

Dan O'Connell, Ohio

Compare Roadtrek to Other Class B and B+ Motorhomes!

Interior Features	170 Chevrolet	190 Chevrolet	200 Chevrolet	Roadtrek Benefits
captain's seats swivel	standard	standard	standard	use cab area to eat, lounge, sleep

Warranties & Other Important Information

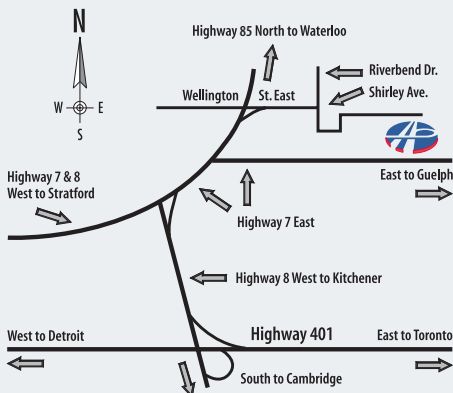

Everyone should go and visit the Home & Park Roadtrek factory in Kitchener, Ontario. What a place. You can see why the Roadtrek is so well put together. The place is spotless and well organized. The people were very friendly and seemed very motivated and happy in their work. They spoke proudly of the jobs that they were doing. We went there on a whim but it turned out to be a great experience that we recommend to all.

Bob Bussolari, Suffield, Connecticut

Come visit our modern 120,000 sq. ft. plant. Tours are available Monday through Friday at 10:00 am or 2:00 p.m. Closed weekends, between Christmas and New Year and all Canadian holidays. Space is limited, so contact us at sales@roadtrek.com or 1-888-ROADTREK to make a reservation.

How to find us!

From Highway 401, take the Highway 8 West exit (to Kitchener) to Highway 7 East/86 North. Proceed on to Wellington Street East and then to Shirley Avenue. Turn right (south) and follow Shirley to our plant at 100 Shirley Avenue on your right.

CHASSIS: 3 year/36,000 mile/60,000 Km limited "bumper to bumper" warranty as offered by General Motors.

MOTORHOME: 3 year/36,000 mile/60,000 Km limited warranty offered by Home & Park covering the manufacture of the motorhome only (does not include the chassis).

APPLIANCES: Those offered on the individual appliances by their respective manufacturers.

IMPORTANT INFORMATION YOU SHOULD KNOW... PLEASE READ

Some units pictured with optional equipment. Certain options may require deletions of standard items or additions of other optional items in order to function properly. Restrictions or limitations may apply to certain options and/or chassis combinations. See your dealer for details.
