Safety and Adventure

... with AZDEL® COMPOSITE PANELS "ONBOARD".
 PROVEN TECHNOLOGY USED IN RVS SINCE 2006.

AZDEL® Composite Panels

AZDEL Composite Panels have been used in RV Exterior and Interior sidewall, ceilings, and roofs since 2006.

AZDEL Composite Panels are constructed using a blend of polypropylene and fiberglass creating a strong, lightweight, quiet, water resistant, temperature resistant, odorless and environmentally friendly wall that will increase the life of your RV.

AZDEL® Exterior Construction

Knock on Wood: Traditional Wood Sidewall

- Absorbs and retains water
- Affected by humidity and temperature changes
- Susceptible to mold, rot, warpage and delamination
- Imported
- Reflects noise
- Heavier

Soak Test

- 60 Day Water Soak Test
- Wood has visible mold and decay requiring wall to be repaired
- AZDEL was 100% unaffected

R-Pod is packed with many great features that are normally found in larger units. If you enjoy cooking, this is the unit for you! Our new concrete-look seamless countertops, the largest refrigerator in its class, and a 2-burner stove paired with a convection oven makes cooking on the road enjoyable. R-Pod also has a brand new interior look, including newly designed vinyl furniture with a honeycomb accent, flush flooring, and Tupelo Honey decor with white cabinetry.

GVWR (Gross Vehicle Weight Rating) - is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR.

GAWR (Gross Axle Weight Rating) - is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles.

UVW (Unloaded Vehicle Weight)* - is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories.

*Estimated Average based on standard build optional equipment.

CCC (Cargo Carrying Capacity)** - is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity.

** Estimated average based on standard build optional equipment.

Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities. The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.

All information contained in this brochure is believed to be accurate at the time of publication. However, during the model year, it may be necessary to make revisions and Forest River, Inc., reserves the right to make all such changes without notice, including prices, colors, materials, equipment and specifications as well as the addition of new models and the discontinuance of models shown in this brochure. Therefore, please consult with your Forest River dealer and confirm the existence of any materials, design or specifications that are material to your purchase decision. 10/20
